"CODE WARRIORS"

JADA MIST

Being rich and famous isn't all it's cracked up to be. Her band's new single—"I Hate Everyone Except People Who Give Me Money"—was played on KSAB university radio for a week, sending sales skyrocketing into double digits. "It's awesome," says Jada while playing Street Fighter Alpha 3 GBA, "I'm getting recognized wherever I go." The only places she goes are to her friend's houses, but you have to start somewhere!

MAYNARD TUCK

He spent all month playing Robotech: Battlecry. And he wrote the best guide ever for you, soldiers! Doubletime it to the middle of the magazine—that's an order! When the RDF contacted him to write a guide, he didn't know what a Valkyrie was. He still don't. Now he's hopping on benches in Manitoba with his rollerskates and challenging the Zentraedi (people from Toronto) to duels.

BENJI GREGORY

The married life has not been so good for Mr. Gregory. The problem being that after a trip to Vegas last spring and somehow coming back with three wives, he now has three times the expenses. The kicker is that each wife wants her own home, which means he has to buy an Xbox for each home too. (To pass the time away while visiting each wife.)

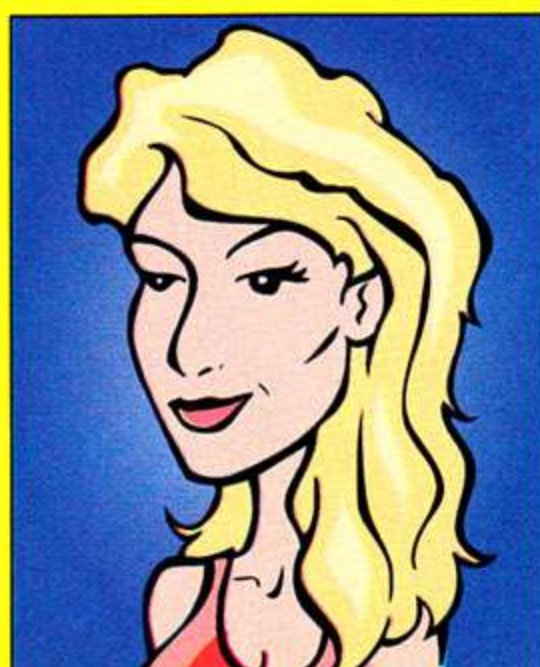

"BLEACH"

Our man with the plan has been keeping his video-game systems busy these days. But now having offed Onimusha 2, beaten Buffy, destroyed Dino Stalker and smashed SOCOM, Bleach passes the time until the release of Vice City by learning Halo's fine art of Warthog Jumping from that cute Marvel vs. Capcom 2 girl. (She called! She called!)

HERBERT ZITOWSKI

Zitowski's not expecting great things from the video games based on The Lord of the Rings, but that hasn't stopped him from watching the new DVD box set religiously. "If I had the Ring of Power, I wouldn't be taking it to Mount Doom. I'd be using it to smite my enemies!" Tough talk from the guy who wouldn't go to school without a photo of his mother.

PRISCILLA BUSSY

Always in pursuit of a life in the limelight, Priscilla is now setting her sights on getting a spot on American Idol 2. Her first step toward this goal is to hit the karaoke scene, and if that goes well, she'll be appearing at a bowling alley near you. All the while she's been keeping up with the vid-game world by playing lots and lots of Ms. Pac-Man.

FLAT LINE LOW NEUTRAL HIGH INSANE

"This game rocks, man. I've spent more money on Virtua Fighter than on beer."

Just what exactly is that meter doing next to our CODE WARRIORS' mugshots throughout the mag? It's simply rating our anticipation or excitement over the game, that's all. Since our staff isn't licensed to review games by the Official Video Games Raters Committee Authority, these scores are not to be taken as review scores by any means.

Frank Provo: Strategy Editor

The Xbox isn't bad. Really. Halo, NFL 2K3 and Mech Assault are excellent, and 2003 will bring Panzer Dragoon Orta, Halo 2 and Psychonauts. It's also worth it just for the better textures in some third-party port jobs, like Robotech: Battlecry and Aggressive Inline. See, it's possible to own an Xbox with pride, even if it is bigger than a couch.

Cameron Davis: News Editor

We haven't seen Cameron for over a month now. The last we heard was that he was going to the great Australian Outback to consult with Aboriginal Elders to perfect his Code Warrior skills. Armed only with his trusty Game Boy Advance, he wandered off in the middle of the night playing Yoshi's Island while muttering "Touch Fuzzy, Get Dizzy". Truly words to live by.

Dan Leahy: Contributing Writer

Dan's preparing for a true holiday season for gamers. When's the last time you could choose from a veritable buffet that includes a new Starfox game, the newest Zelda adventure, Blinx, Splinter Cell, GTA: Vice City, Shinobi, The Getaway and much, much more. Then there's also the launch of Xbox Live, which should fill anyone's online appetite nicely.

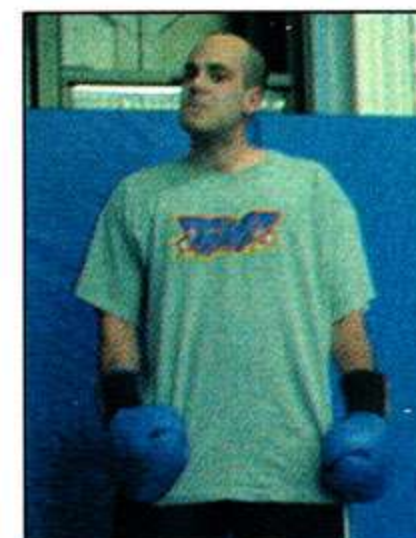

Doug Trueman: Previews Editor

A singer, songwriter, actor, producer, director, cinematographer and set decorator, Doug Trueman (center) spends his free time playing gigs with his rock band Running From Ruby. He's also been a contestant on Tough Enough 3, Fear Factor, Blind Date and the new Star Trek spinoff Killing William Shatner.

Ed McGlothlin: Contributing Writer

A former speechwriter and newspaper columnist, Ed McGlothlin operates from a base in Tallahassee, Fla. Word is that he was behind the presidential recount and Steve Spurrier leaving college football, but nobody knows for sure (and Ed isn't talking). When not writing about games, Ed can be found causing trouble for a variety of government agencies, media outlets, or anyone willing to write a paycheck. He is also writing an extensive biography on his computer mouse.

Scott Steinberg: Editor at Large

Now unhealthily obsessed with all things Tolkien after penning our cover story, Scott realized he'd developed a problem—hair had begun to grow on his foot. What's a reasonable writer to do? See the doctor, one would think. But noooo...he just had to take to puffing on a pipe, stroking the One Ring, and making uncouth remarks about Gandalf's wand.

THE SOURCE FOR NEXT-GENERATION GAMERS: *ONE GAME TO RULE THEM ALL...*

To say that J.R.R. Tolkien's *The Lord of the Rings* trilogy has influenced countless works of fiction, movies and video games would be an understatement. In the world of video games in particular, it's even influenced the way we played many games. (Mind you, that last sentence was past tense.)

You see, long before any licensed *LOTR* games were available, players would romanticize that their warrior in *Gauntlet* (and I'm talking about the original arcade version that shouted, "Yellow warrior has shot the food") was Strider, or that they were fighting Smaug anytime they ran across a nasty old dragon.

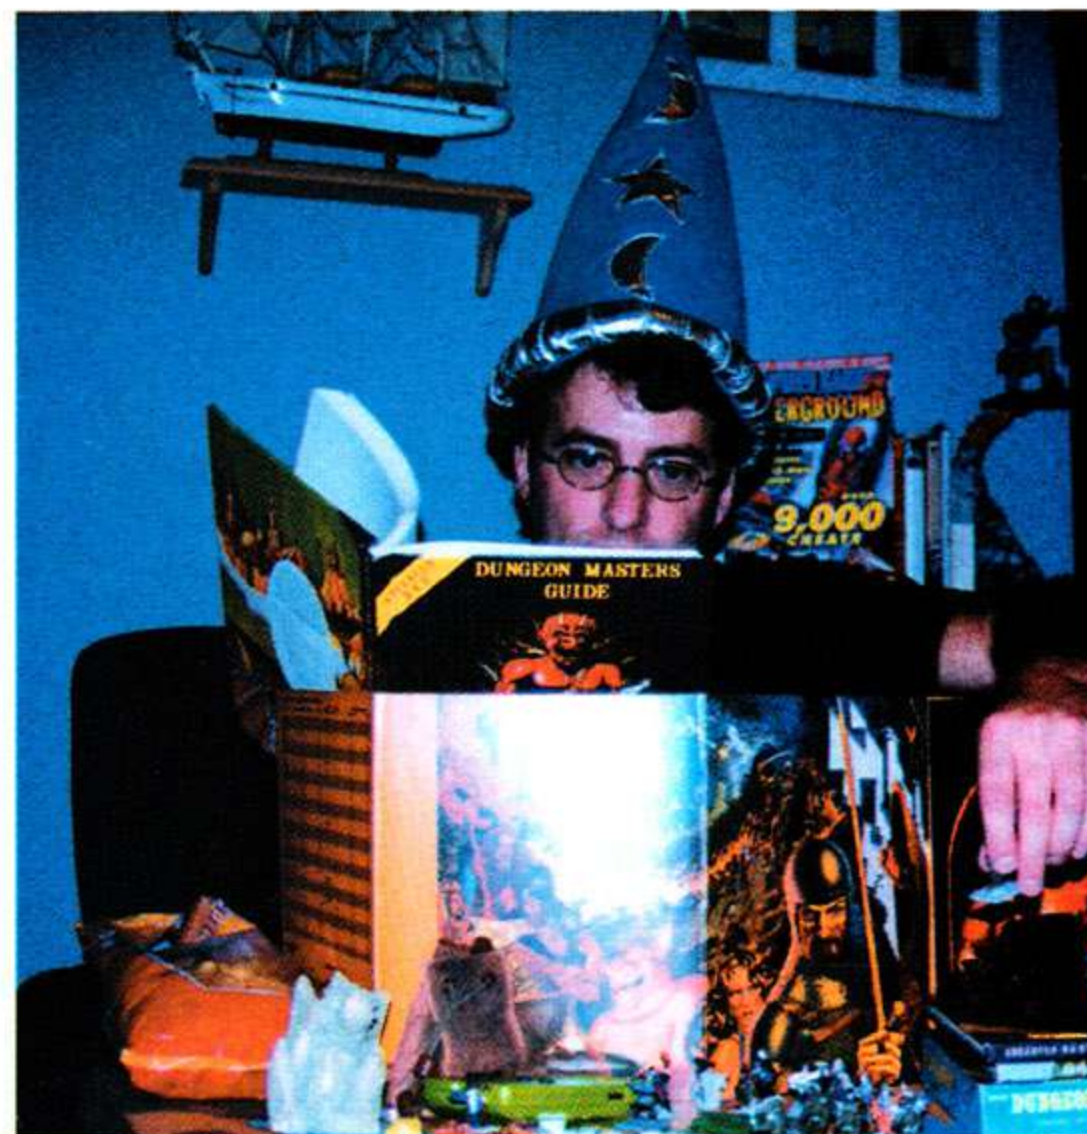

As some of us may relish those halcyon days we now call "old-school," it does hurt to look back at the clunkiness in the technology we had back then and the amount of compromise game developers had to impart due to the shortcomings of game-console hardware.

Fast forward about 20 years from then, and we're in the middle of the greatest system wars in the history of video games, with game systems more powerful than NASA computers and the industry itself raking in profit rivaling that of Hollywood. In the midst of this war steps Electronic Arts with a colossal licensing deal on its hands and a development team (Stormfront Studios) that can bring Middle-Earth to video gamers like never before. Replete with the storylines and medieval environments we've come to know so well, we no longer have to *imagine* our sprite-based characters as the legendary heroes of Middle-Earth—now they *are* those heroes.

For those who were not willing to invest the time into reading the trilogy in book form or spend three hours in a theater, this could be their first experience with the magnificent characters of this world. And it wouldn't be a shoddy introduction by any means, as Tolkien's world and characters are in excellent hands with EA's team. All the depth, mystery and wonder of this invented world are flawlessly embodied in the video game.

I think you'll agree as you read through this issue's cover story that interest in all things Middle-Earth are at an all-time high, and that we probably haven't seen the last of those darned little hobbits for a long time to come.

THE LORD OF THE RINGS THE TWO TOWERS

FINAL FANTASY

**The Two Towers:
Electronic Arts' One Game To Rule Them All**

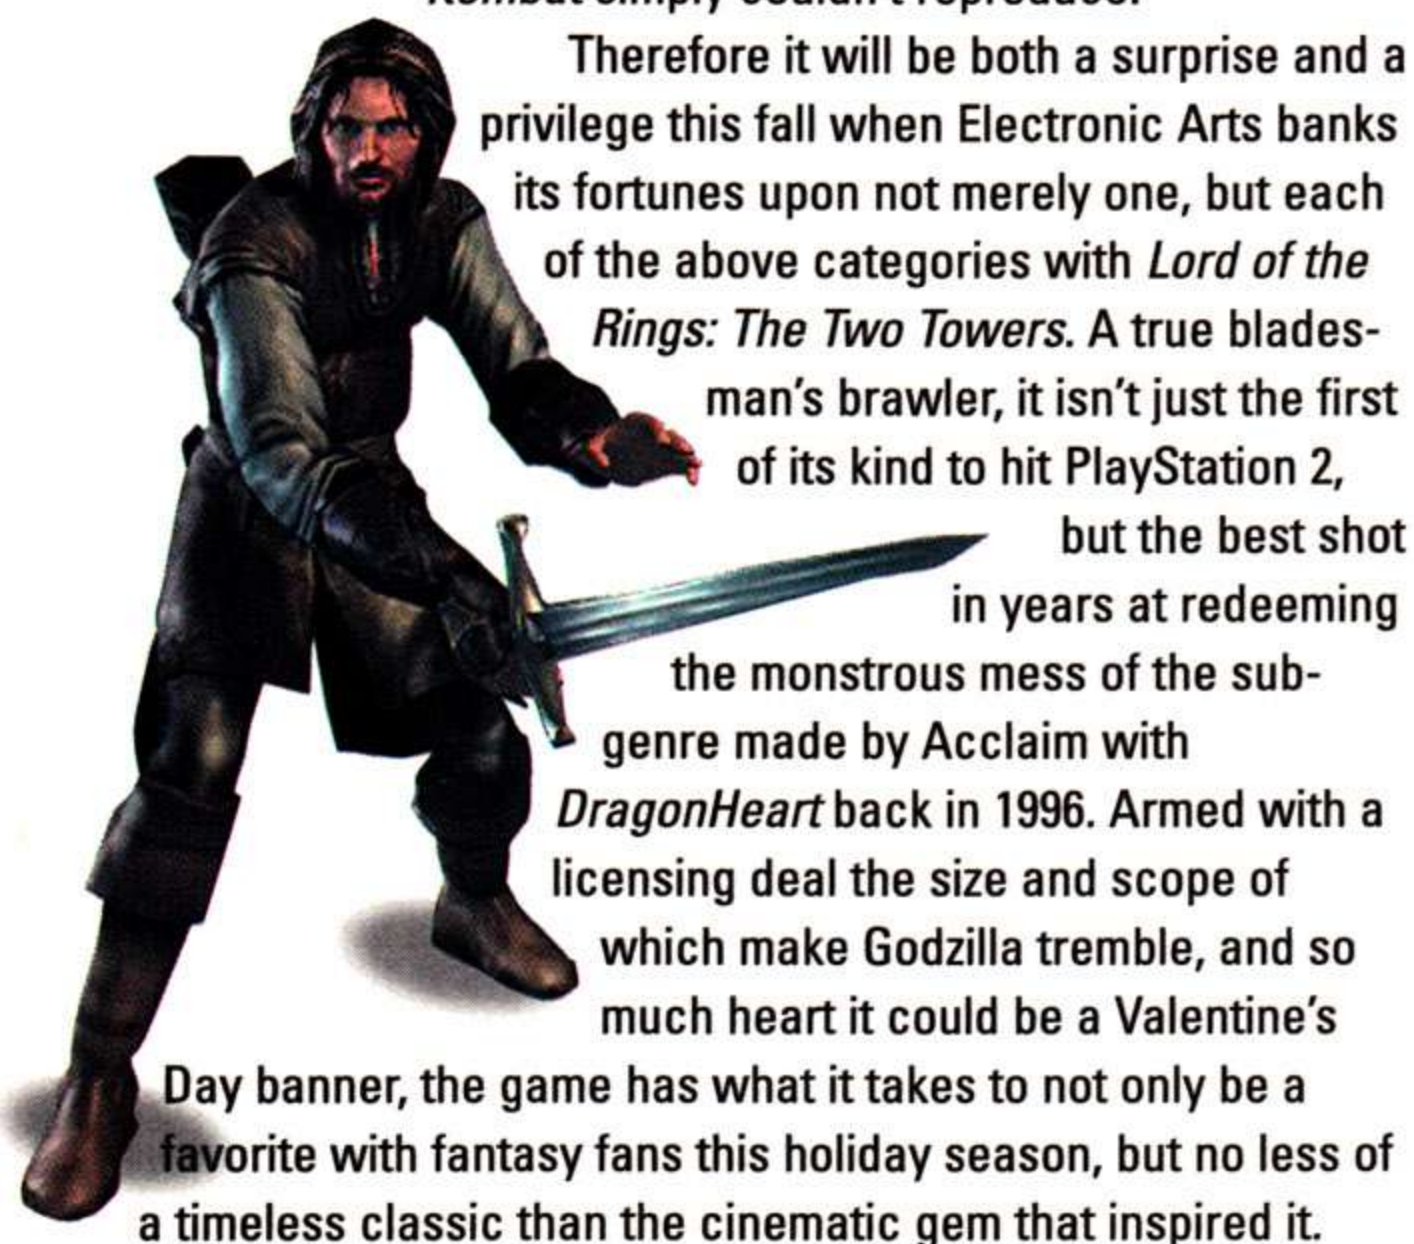

By: Scott Steinberg

SINCE the days of Final Fight, beat-'em-ups have held a special place in gamers' hearts. From Vigilante to Streets of Rage, millions of fans have enjoyed putting a forcible stop to more two-bit punks' criminal careers than the American justice system. Publishers never minded greenlighting these projects either, since they served as fast, flashy—and, more importantly, frugal—ways of displaying technical eminence. But with changing platforms and maturing tastes, audiences all but abandoned this once-prominent genre, tossing titles like Splatterhouse by the wayside. These days, such items, most often spotted on MAME emulators across the globe, serve only as sad relics of a bygone era.

THE LORD OF THE RINGS THE TWO TOWERS

DITTO goes for swordfighting simulations, another casualty in the ongoing technology wars. While *Bushido Blade* and its progeny scored high honors at one time with hardcore gamers, the most demanding of audiences, they're now but minor footnotes in history, having long since faded from the public consciousness. In some ways, it's understandable. After all, there are only so many Samurai-spirited products one can stomach. Still, the loss is profound, as these titles, generally the sole real-life-inspired forays into melee combat, provided a gameplay experience ridiculous rivals such as *Street Fighter* and *Mortal Kombat* simply couldn't reproduce.

Therefore it will be both a surprise and a privilege this fall when Electronic Arts banks its fortunes upon not merely one, but each of the above categories with *Lord of the Rings: The Two Towers*. A true bladesman's brawler, it isn't just the first of its kind to hit PlayStation 2, but the best shot in years at redeeming the monstrous mess of the sub-genre made by Acclaim with *DragonHeart* back in 1996. Armed with a licensing deal the size and scope of which make Godzilla tremble, and so much heart it could be a Valentine's

Day banner, the game has what it takes to not only be a favorite with fantasy fans this holiday season, but no less of a timeless classic than the cinematic gem that inspired it.

THREE AMIGOS

Director Peter Jackson's film is filled with wondrously imaginative heroes. Equipped with the license—a watershed of inspiration for any creative brain trust—it was surely a difficult task for the crew at developer Stormfront Studios to pare the list

down to the current starring three, even with close to 100 people actively working on the project. Nonetheless, your choice of comrades for the adventure includes three mighty selections in their own right, namely the ever-popular Gimli, Legolas and Aragorn. As should be obvious and fortunate for the foot-hair impaired, unlike in rival titles, the list doesn't contain any helpless Hobbits. Whether that's a positive or a negative, have a glance at the following info and be the judge. We're confident you'll make the right decision.

See, Aragorn is a fearsome warrior...a true master behind

RIVAL RINGBEARER

J.R.R. Tolkien is dead, but boy, will his name be attached to many games in the years to come. In addition to *The Two Towers*, Universal Interactive—holders of the book license, as opposed to Electronic Arts, who holds the rights to the movie—will launch *The Fellowship of the Ring* for PC, PlayStation 2 and Xbox later this year.

Beginning with Frodo's journeys in The Shire and continuing until he crosses the River Anuin, the third-person action-

adventure focuses more on puzzle-solving and small-scale combat confrontations than its immediate rival. Levels will be lengthy (spanning up to a half-mile in size) and there's a whopping two dozen of them to explore as the aforementioned Hobbit or pals Gandalf and Aragorn. Playing these different roles will result in differing gameplay experiences, ranging from stealthy turns while made invisible by the One Ring to swordfights and sorcerous duels.

Against enemies including goblins, orcs, wolves, trolls and spiders, you'll

wield blade, staff and dagger on a quest to end Sauron's menace. Ranged and melee attacks are available, as are spells. For the more patient or pragmatic gamer, it's a plausible alternative to our cover feature.

the blade. A balanced fighter with a decent hit-point tally who relies on timely sword swipes and sweeping blows, he doesn't require the services of a magical ring to inspire fright in foes. Able to inflict medium-level damage within a reasonably rapid time frame, the one they call Strider is an excellent choice for those seeking an all-around capable companion. He's also a true terror once powered up. Slower than Legolas, less burly than Gimli, this daring do-gooder nonetheless presents an intimidating challenge for any enemy itching to whet his weapon's appetite for human blood.

Perhaps speed and finesse are more your calling, however. In that case, Legolas is a suitable alternative, relying on whip-like reflexes and an expertly crafted bow's swift long-range strikes as his weapon of choice. A relatively weak combatant, it doesn't take much to gut the man's slender elven hide, but adversaries will have to catch him first. Remaining at a distance and attacking from afar is his strength, as creatures can't get close without taking at least a goodly amount of damage from his flesh-biting arrows. Quickest of all the main characters, but also the weakest, adopt him as your alter ego only if a hit- and-run strategy best suits your strategic bent.

Last, yet certainly not least, Gimli can go toe to toe with almost any rival and emerge none the worse for wear. A veritable walking tank, the dwarven fighter carries his battle axe high (or at least as tall as a miniscule stature allows for), knowing that

SECRET SERVICE

The Two Towers Delivers the Extras In Style

Every game features hidden goodies. Some introduce new costumes. Others offer additional vehicles. Play PC classic *SimCopter* and you'll be treated to same-sex coupling (no, really). Rather than postulate romantic possibilities between Gandalf and Gimli, however, *The Lord of the Rings: Two Towers* has some better goodies up for grabs.

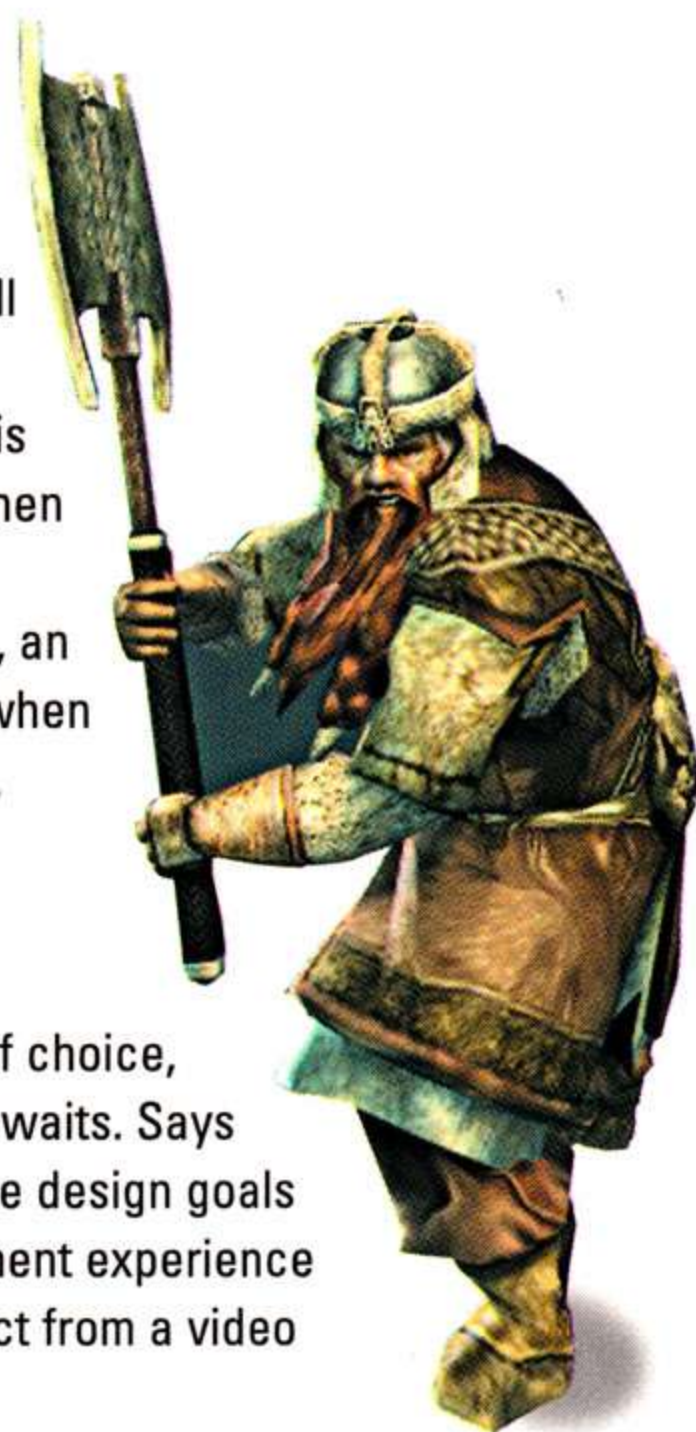

Take your heroes past level 6 or 8, and you might just unlock another mission. Still not satisfied? All right, your majesty, how about a new playable character? Sounds good, we know, but certainly not the tip of the iceberg. Film fanatics are the true beneficiaries of the treasure trove of clandestine content featured here.

Never-before-seen production materials are the icing on the cake. We're talking storyboards, artwork, design mock-ups...the works. You'll even be treated to interviews with the various acting talents involved, all of which aren't featured anywhere else. In a sense, the game can double as its own interactive DVD. If that doesn't put the wizardry back in your wand, we don't know what will.

possessed of the most hit points, few troublemakers can take him down. Plodding, but powerful, this soldier lets thunderous chops do the talking, cleaving through even the hardest evil-doer's defenses with ease and leveling a merciless ending upon any opposer foolish enough to fall before his initial feints. The sole downfall one must watch for is his lack of speed, a critical failing when fleet-footed enemies attack en masse and work to surround you, an event less prone to occurrence when other characters are relied upon.

A CUT ABOVE

Whomever your champion of choice, rest assured an epic adventure awaits. Says producer Scott Evans: "One of the design goals has been to create an entertainment experience that goes beyond what you expect from a video

THE LORD OF THE RINGS THE TWO TOWERS

game. Just as Peter Jackson has forever altered people's visions of the Tolkien universe, that's how we're hoping to alter their visions of gaming, with help from a huge license." To this extent, his team has focused on painstakingly re-creating Middle-Earth down to every foremost detail, with all major locations, scenes and characters featured in the movie also in the interactive conversion.

But it isn't just about getting the basics right. Stormfront has done what Evans calls a "spectacular job designing a sword-combat game that allows you to build upon experience and grow as a character—something no one's ever done before." Essentially, not only do the slashing, parrying and lethal impale maneuvers reserved for prone enemies handle like dreams, they also serve as an upgrade system in and of themselves. Chaining together hits is an important gameplay concept, given that it generates skill points which can then be spent on five levels of power-ups following each mission, ranging from multi-hit attacks to the ability to incite berserker rages or increase the hardness of one's hero.

Peak combat performance doesn't just generate reward opportunities; it's also an essential part of play. Orcs, worg riders and uruk-hai (horrific man/orc hybrids) assault in groups, each armed with varying weapons. Standing off against these opponents alone, you'll have to learn to outflank, outwit and outfight enemies, whether this means smashing their shields with a series of well-placed blows or stunning a couple creatures long enough to push them into a carnivorous creature's burrow. Some challenges, such as the confrontation atop the walls of Helm's Deep, where Sauron's forces race to put up ladders and scale the structure before you can kick them down, straight out can't be surmounted unless you use specialized melee maneuvers to save time.

Being a combat simulator, you'll be thrilled to know that even in beta form, the game handles like a battle-hardened veteran. Executing moves is as simple as a few swift button presses, with mastery of timing settling upon you as a natural progression of extended play. Whether confronting base enemies or bosses such as worg rider leader Lurtz or the stupefyingly powerful Cave Troll, who rends the earth with every crushing cudgel blow, one can at the bare minimum rest easy knowing he possesses a fighting chance, however minimal. The net effect of such a well-defined play model: your complete immersion into the game.

SHOCK TREATMENT

To call the experience intense would be an insult.... If that loincloth isn't soiled within the first 15 minutes, we'll eat our *Red Faction 2* hats. Each and every scene depicted in this title features a level of intensity previously unimagined in a next-generation console. It isn't so much a byproduct of stunning visuals and staggering aural production values (although both are certainly present) as the fact that environments practically writhe with

activity. While a linear quest by nature, the 2D/3D aspects of its design lend themselves particularly well to quelching one's suspension of disbelief. And trust us, the effect has to be seen to be believed.

"It comes down to creating an entire experience," says Evans. "Everything the character sees, feels and hears must be addressed. Not only did we craft a powerful audio system to tie effects to certain events and shifts in pacing in each stage, but we also paid attention to classic movie elements like lighting and scale." Take, for instance, a jaunt into a village on the Rohan level. Crumbling houses burn, their thatched roofs aflame, while

INSPIRED BY THE RING...

THE BOOKS:

Large collections of fantasy are now common in most popular bookstores. From classics like *The Sword of Shannara* and Michael Moorcock's *Stormbringer* to modern adaptations of the *Dungeons and Dragons* fantasy worlds including R. A. Salvatore's *Dark Elf Trilogy*, all of them include magic, lush worlds, epic struggles and larger-than-life heroes. In addition, these works brought a greater variety to the genre, allowing the fan base to grow. Fans of medieval fantasy who didn't really see themselves as an unassuming "Frodo" in *The Lord of the Rings* could now have an opportunity to see themselves as a serious, anti-heroic "Elric" as seen in *Stormbringer*.

THE FILMS:

Modern films are nearly as numerous, adding a visual context to the viewer's imagination. Earlier films such as *Conan the Barbarian*, *Dragonslayer* and *Excalibur* provided existing readers of the genre with a rich, new medium to "live" their fantasy. Animated fantasy also came into modern film with Ralph Bakshi's *Wizards, Fire and Ice*, and *The Lord of the Rings*. Recent additions to film that pay homage to the works of Tolkien include *Dragonheart*, *Reign of Fire* and most notably Peter Jackson's *The Lord of the Rings* films.

THE ROLE-PLAYING GAMES:

The most popular gaming product of J.R.R. Tolkien's fantasy epic *The Lord of the Rings* is arguably *Dungeons and Dragons*. This fantasy role-playing game features orcs, elves, wizards, castles, hobbits (called "halflings" here), dwarves, adventure, and of course, dungeons and dragons. Other games followed, such as *Tunnels and Trolls*, *Warhammer Fantasy*, and quite naturally, the genre's own *Middle-Earth Role-Playing Game*. Each game is unique in its design, game mechanics and overall storyline. These games (and many more too numerous to mention here) all have their roots seeded from Tolkien's masterwork of adventure, such as rules for using magic, playing non-human races, and navigating vast underground catacombs.

THE VIDEO GAMES:

Video gaming is also not without its own contributions to the genre as influenced by Tolkien's works. As a marriage between the imagination of fiction and the experience of role-playing, console video games have always been quick to adapt to and fulfill the desire to "live" the adventure. From its beginnings as the Atari 2600's *Adventure*, the video game's additions to medieval fantasy have always been well-received. Subsequently, Nintendo's *Zelda* and Sega's *Golden Axe* only added momentum to the genre. Games like *Blood Omen: Legacy of Kain*, *Suikoden* and the relatively new *Gauntlet Dark Legacy* continue to entertain those whose desire is to wield an ancient sword or to cast powerful spells. Computer games, although slower to come into their own, compensated for their shortcomings with subtlety, complexity and immersive atmosphere. *Ultima*, *Phantasie*, *Alternate Reality*, *Pool of Radiance*, *Icwind Dale* and *Dungeon Siege* are only a few RPG titles added to the history of interactive medieval fantasy. And finally, *Everquest* and *Dark Age of Camelot* bring a new perspective on the art form: massively multiplayer role-playing. —Brian Sheveland

murderous uruk-hai ravage the remaining townsmen, terrorizing women and children and launching corpses through closed doors. While confronting the creatures, you may find that through the force of your attack, not only will blows rend flesh and bone, but chance run-ins with open flames set them ablaze, giving you the added edge.

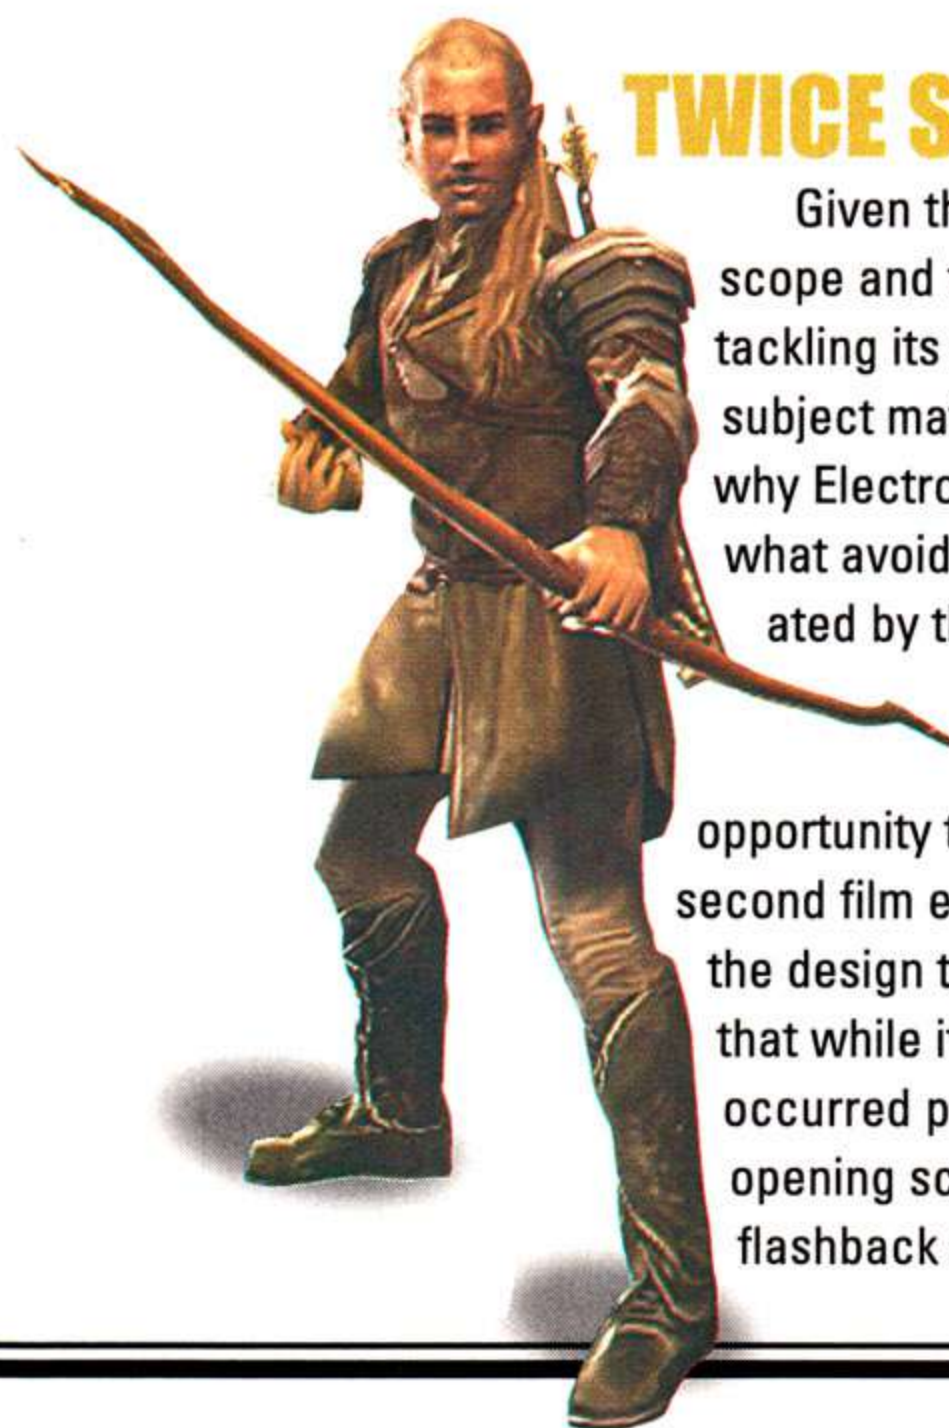

Perhaps the siege at Helm's Deep will make more of an impact. Charging across a living, breathing siege, you'll do battle with orc swordsmen while flaming arrows, catapulted stones and the bodies of fallen warriors rain down. In the midst of the fray, allies—including other featured heroes and bonus characters

THE LORD OF THE RINGS THE TWO TOWERS

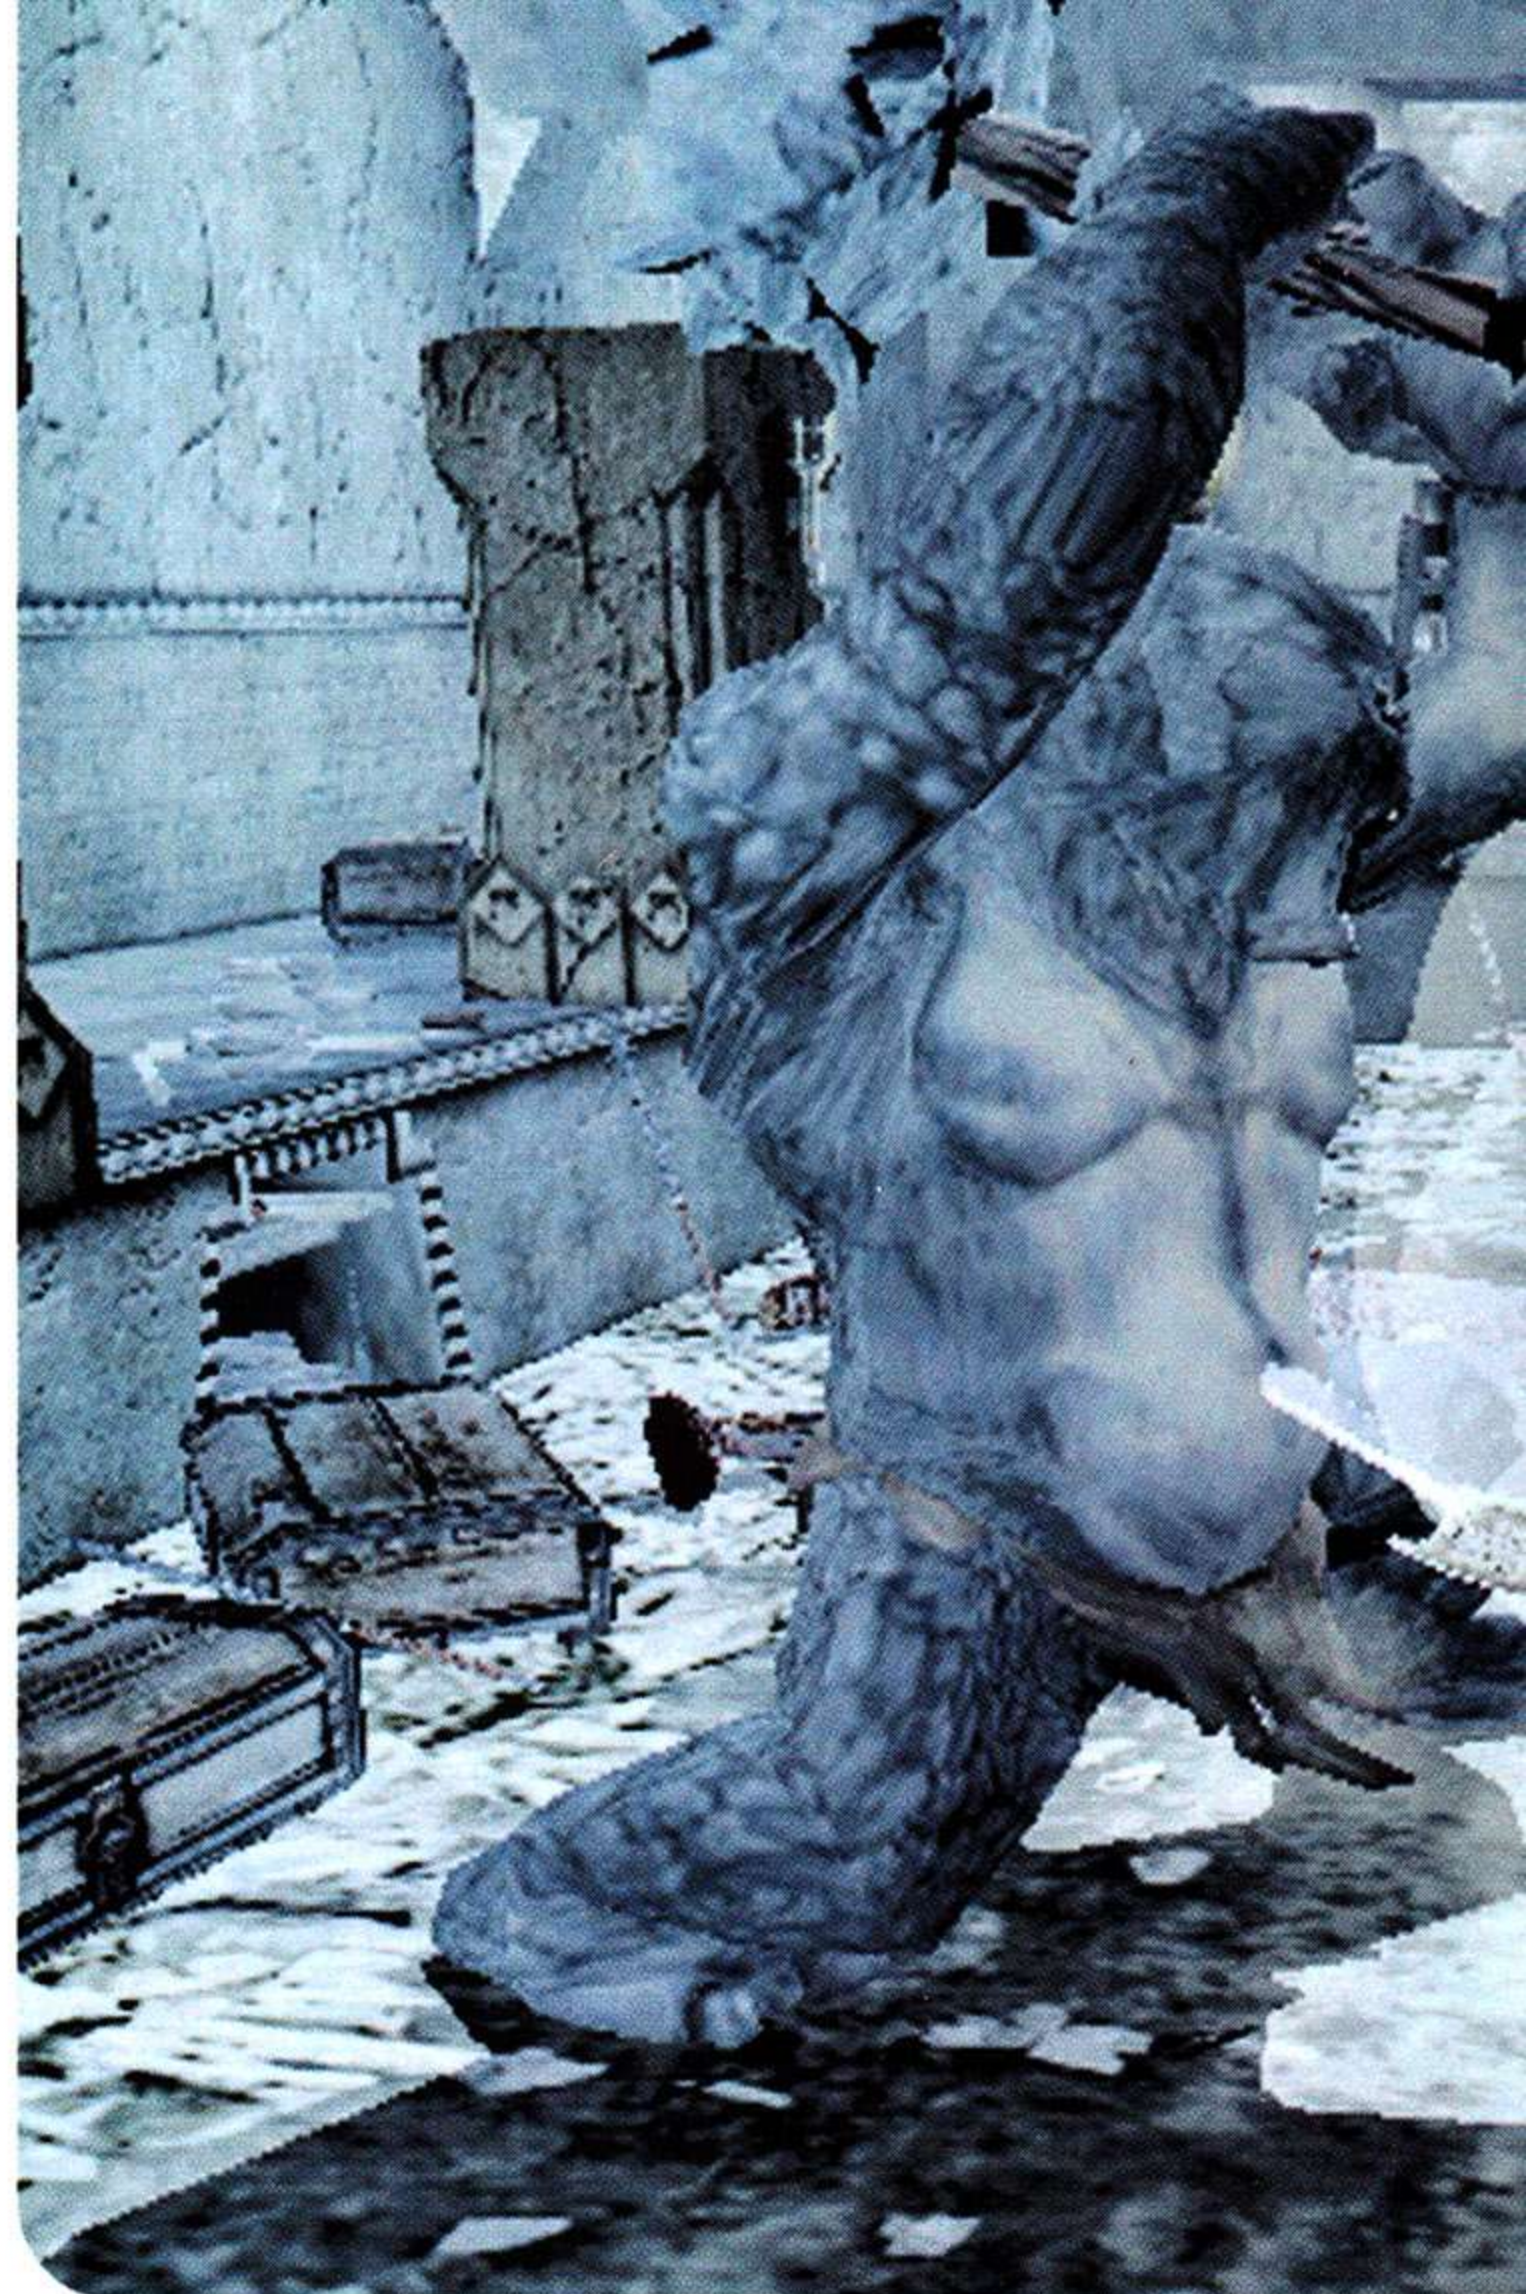

such as Gandalf—may call for aid, demanding a quick rethinking of tactics. Meanwhile, chaos still rages, computer-controlled foot soldiers clash with opposing armies, and the chances of taking an errant projectile upside the helmet range from “duck” to “incoooooommmmmiiiiinnngggg!”

More is the awe-inspiring wonder when you realize 13 levels—including a secret stage—have all been rendered this realistically. Never before has one game done such a smashing job capturing the sense of anarchy that permeates a full-scale confrontation. Between Fangorn Forest, Moria and the Balin's Tomb, a complete range of Tolkien-penned locales promises mass medieval bloodshed on a scale best befitting the Crusades. One small peek reveals this adventure's gonna be—how do the kids say?—hella amazing.

TWICE SHY

Given the product's grandiose scope and the success achieved tackling its admittedly game-friendly subject matter, one has to wonder why Electronic Arts elected to somewhat avoid intellectual assets generated by the original movie. Evans explains that the publisher “saw this as an opportunity to bring the player into the second film early.” Along those lines, the design team crafted the title so that while it touches upon events that occurred prior to *The Two Towers'* opening scene (“addressed as a flashback sequence at the beginning

of the game," Evans states), eventually you catch up with and forge ahead into the currently featured quest.

A fact for which you'll likely be grateful, as it's allowed the team to adopt a more focused stance on development. Accordingly, a great deal of effort was poured into researching and re-creating the original material on which the quest is based. Gushes Evans: "New Line's been great. So has Peter Jackson. Right away, they understood we needed critical input and first-hand access to footage, deleted scenes and production models, plus the freedom to push boundaries to make this a great game. By far, it's been the best licensed property experience I've been involved in. Because of this, we can really enmesh players inside Middle-Earth."

Frankly, it isn't getting into the groove so much as dragging yourself out that you should be worried about. If all goes as planned, and no major bugs undermine Stormfront Studios' efforts thus far, *The Two Towers* could prove the most addictive legalized commodity this side of caffeine. Already eons beyond what we've come to expect from the typical swords-and-sorcery affair, the game's just as likely to seize the imagination of casual consumers as it is hardcore types. Seeing as the original works by Tolkien upon which all the impending hullabaloo is based have entertained only, oh, countless generations of readers around the world, is a true shot at stardom for the best fantastical fling since *Kingdom Hearts* really that farfetched?

The Golden Flower Pawnshop pays massive amounts for forklifts and animal trinkets. In Kowloon, the Kowloon Pawnshop has the highest payoffs of the two.

EASY MONEY

Take advantage of the fact that you can save at any time. After you're robbed to open the game, scrounge up some money and go to Warehouse #9. Save. Bet the farm on the biggest payout. Keep restarting until you win above \$100. Go to Warehouse #10. Save. Place a maximum bet and repeat the process.

THE THIRD WUDE

Inside Zhangyu's Barber Shop (Three Blades Street), you'll have to endure a haircut to acquire your third aspect of the Wude martial art. DO NOT PRESS ANY BUTTONS during this scene—not even when prompted. It's a test, seriously.

THE FOURTH WUDE

Another trick! You have no hope of winning the Free Battle against Master Lishao Tao. So don't even bother. Run away and the CPU will automatically fight for you.

KEEP FANGMEI HAPPY

Fangmei is the woman who sweeps the Man Mo Temple. You should do your best to initiate conversations with her and then walk away so she'll reinitiate them with you (e.g. play hard to get!). While talking to her, the trick is to respond with answers that won't make her angry or upset. You'll have many occasions to do this, but you should also have met her friend Eileen once as well. Once it is between Feb. 27 and March 2, go to Complete Clothier on Three Blades Street and observe Fangmei. Buy the bracelet she was looking at and give it to her on March 3. She will be in room 207 of the Da Yuan Apartments. This will net you a lucky amulet!

USE THE CHAIWAN FOR FUN

After Guixiang tells you about the ChaiWan, you can use it to

trigger events at the many eateries and tea shops in town. The ChaiWan looks like a reversed check mark and you form it out of four teacups. Just make a V with three of the cups and place the fourth above and left of the leftmost cup. Don't do it at the Dou Jiang Diner until you're ready to leave for Kowloon, however, since you won't be able to use the ChaiWan once you initiate the Diner scene.

WIRETAP CONVERSATIONS

Find the trash bin with all of the cassette tapes and listen to them one by one. The last one has the clues you need to continue the story. Fast forward to 650 to hear a conversation between Joy and Chen Guizhang from the first Shenmue. There's a lot of good info on the tape, but if you get bored, forward to 590 to advance the story.

BEAT DON NUI

The dodge button is your friend in the final battle of Kowloon. Avoid Don Nui and let him attack you. When he attacks, dodge and then unleash your own combo. Never attack first. Never attack from the front.

GET THE MEDALS

There are three medals—bronze, silver and gold—and they really don't do anything by themselves. But they're worth bragging rights. Since you need to find them before leaving for Kowloon, the acquisition of the ChaiWan symbol is a hint to wrap up this miniquest.

Bronze Medal:

- Walk down the alley to the right as you're facing away from the entrance of the Come Over Guest House.
- Play dice with the man sitting on the ground at an intersection in the Lucky Charm Quarter.

Silver Medal

Get the bronze medal, then meet Izumi and Eileen at Tomato Mart and Pigeon Park. Now, go to the third floor of the Pine Arcade in Golden Quarter and tell the guard you wish to participate.

Gold Medal

Head back to the third floor of Pine Arcade to fight Izumi. After you win, go to Man Mo Temple and catch leaves until a feather falls from above. Catch it and return to Tomato Convenience Store. Win the Duck Race to get the gold medal.

UNHAPPY ENDING

If you pass time until July 31, you'll see an unhappy ending.

HALO - HELPFUL BUGS AND EASTER EGGS

PILLAR OF AUTUMN - KILL THE BRIDGE CREW

Once Captain Keyes gives you the pistol, run back to the bridge and kill someone. Cortana will order a security team to kill you. Ha ha!

THE SILENT CARTOGRAPHER - CLIMB ABOVE EVERYTHING

When Foe Hammer drops off the Warthog, drive until you reach the path that leads up the hill into the middle of the island—and force the Warthog up the path! At the top of the path, just before you enter the clearing where the Hunters are, there's a big rock with a tall ledge to the left of it. Drive past the rock, turn around, and then drive the Warthog up the rock. You'll want to park it right on top or have it situated so that it's perpendicular between the rock and the wall. Jump off the back of the Warthog and on top of the bridge. Now, you can attack all of the aliens before they even know what's hit 'em.

ASSAULT ON THE CONTROL ROOM - TAKE A BANSHEE FOR A RIDE

In the first portion of this level, called "I Would Have Been Your Daddy," you can get a Banshee long before

you're supposed to. Right after you exit the first few tunnels, you'll encounter a series of clearings. One of them has a Warthog jeep and the second has a tank. The third has nothing—or does it? Look up. See that platform with the flashing lights? Cool. Run forward until a marine makes a comment about Covenant Mortar Tanks, then turn around and fire a rocket at the bottom of the platform. A Banshee will drop down!

ASSAULT ON THE CONTROL ROOM - TAKE ANOTHER BANSHEE

Again, make sure you have a rocket launcher. Right when the act entitled "If I had a Super Weapon" begins, run toward the door and zoom in with the scope. You'll see a Banshee parked on the bridge just past some rocks. Fire at the ground near it to flip it over. That will prevent the Covenant from using it, but you can now steal it and use it to fly to the top of the pyramid. Sometimes, you can also just run really fast down the bridge and steal the Banshee outright.

343 GUILTY SPARK - AVOID ALL JUNGLE COMBAT

Right when the opening cutscene ends, keep tapping the left trigger to hurl grenades while inside the dropship. The ship will take off with you still inside and bring you to a cliff high above the jungle! Walk to the left along the cliff and you can drop down and enter Halo's control center without fighting any Covenant forces.

THE MAW - "BIG GRUNTY THIRST"

In the last tunnel, after you've left Foe Hammer behind, check for an open door to the right as you're driving through the last shortcut. There's a gray Covenant grunt in here that says a rather amusing line of gibberish about nibbling his food.

DEAD TO RIGHTS - TRICKY BOSSES

THUGS & PATCH - CHAPTER 6

When using the attack helicopter, remember that headshots are your best friend. It only takes one or two shots to kill a goon if you aim for its head, but six or more if you hit its body. To beat Patch: First, focus your firepower on the tires, doors, trunk and hood of each escort. Now, do the same with Patch's limo, but shoot his missiles when he returns fire.

HELICOPTER - CHAPTER 13 (SECTION 3)

The dock in the third section of Chapter 13 seems difficult, especially when you have to destroy the attack helicopter and fight off all of the goons that it's deposited. But here's the trick: Don't bother with the helicopter! Just keep killing thugs and eventually the chopper will leave.

MAYOR PINNACLE - CHAPTER 13

At first, this guy seems indestructible. Don't even bother punching or kicking him and use your dive move to dodge his attacks. Keep dodging until he does a combo that wears him out. While he's recovering, get behind him and push the throw button. Now, repeatedly tap buttons to choke him. After five or six rounds, he should be toast.

MEESHAKA & SHADRAKA - CHAPTER 13

After you plant the explosives, these babes arrive to spoil your fun. Focus on Meeshaka, as she's carrying twin automatics that can really ruin your day. Load up on ammo and target her up close, then strafe around her in circles or use slo-mo to waste her. Be wary of health-pack locations.

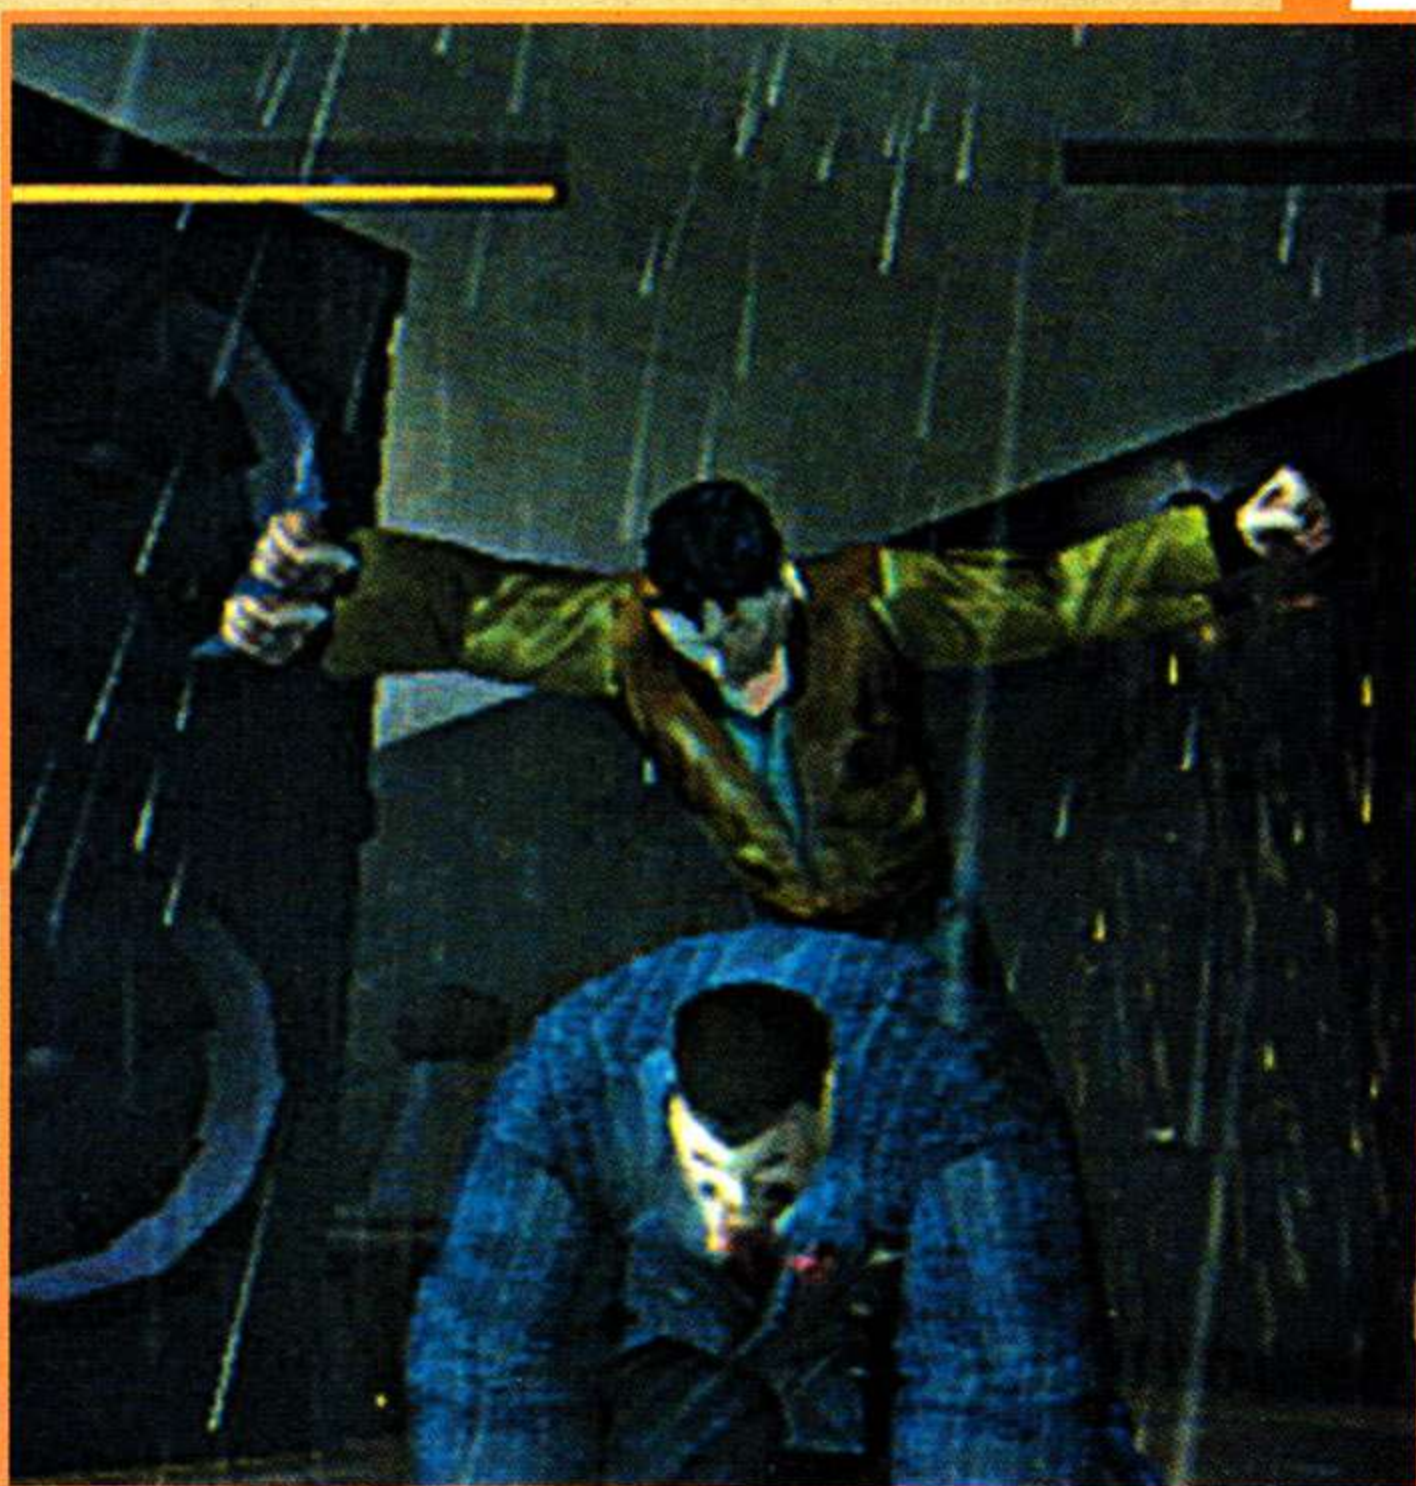

Shadraka can't hit the broad side of a barn with her grenade launcher, so as long as you keep moving, she won't touch you. Once they're gone, exit the hanger from the door in front of the airplane's nose.

HENNESSEY - CHAPTER 15 (FIRST BATTLE)

After you destroy the attack copter, you have to face Hennessey. His riot shield is electrified so don't bother attacking him up close. Stay locked on with your targeting cursor and circle around the fountain. Fire off a shot once in a while and Hennessey will short himself out. Once the shield is gone, attack normally.

HENNESSEY - CHAPTER 15 (SECOND BATTLE)

Hennessey has set his hands on fire to fight you! Stay near the entrance to the furnace room and use your P, P, P, P, K combo on him. You can block his attacks, but they deplete your adrenaline fast, so be aggressive. After you take him down to 50 percent health, he'll open the doors to the furnace. Keep fighting him as before until he's down to 25 percent health. Now, use your P, P, P, K combo or throws to knock him into the furnace. He'll catch fire, but you're not done yet. Don't let him touch you! Finish him off with a five-punch combo!

KINGDOM HEARTS BOSSSES AND SECRETS

Boss Tips

CLAYTON - DEEP JUNGLE

When Clayton climbs onto his lizard, use normal attacks to knock him off and let your partners deal with the reptile. Stay close to Clayton and continue to use normal attacks and spells to damage him. Do not lose track or he will heal himself! As long as you keep hitting him, he won't be able to use his potions.

CENTIPEDE - AGRABAH

Focus on the spiders and don't bother with the centipede in the first area. In the second area, fight the centipede and ignore the spiders. Keep alternating until the beast is history.

URSULA - ATLANTIS

Ursula is tough, but she has a weakness. Whenever she throws a potion into her cauldron, it will change color and tell you what magic to use against her. White is normal attacks, blue is ice attacks, yellow is for thunder attacks, and red is for fire.

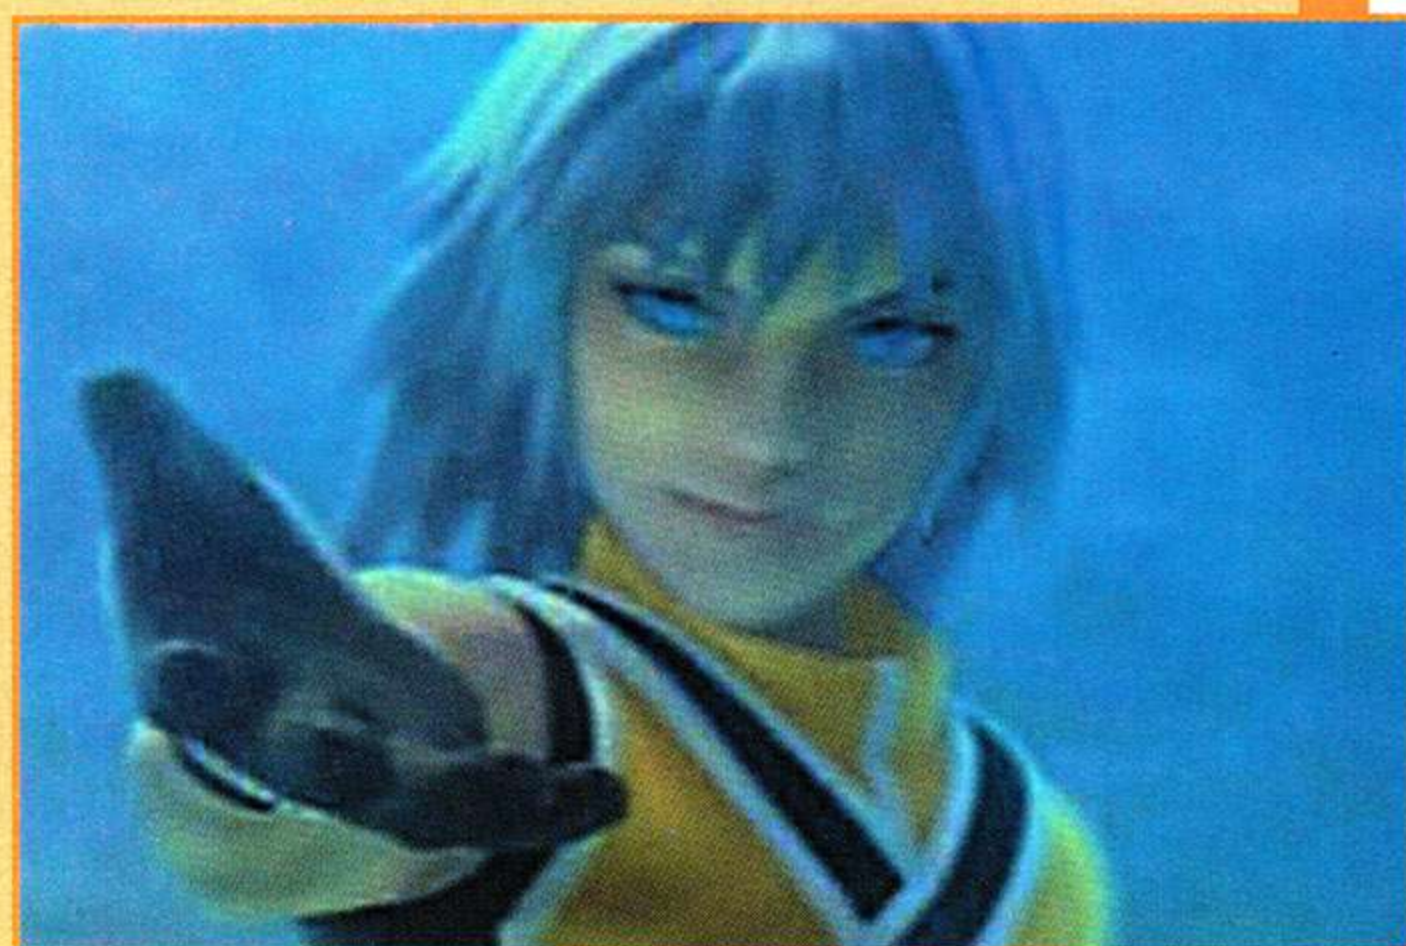

OOGIE BOOGIE - HALLOWEEN TOWN

Cast fire magic to activate the roulette symbols and then slash at the symbol across from Oogie Boogie. You'll be levitated to his height and can then attack him normally. After a few repeats of this, you have to destroy all of the purple orbs.

THE BEHEMOTH - HOLLOW BASTION

You'll fight the Behemoth at various points in the game. He's very strong and magic is useless against him. Slash his horn when he ducks and climb on top of him when he's crouched for an extended period of time. Otherwise, stay out of his way!

ANSEM - DESTINY ISLAND

You're going to want to max out your inventory of Elixirs and place Cure magic in your magic menu. Avoid Ansem's attacks and keep waiting away on him with normal and special attacks. It will take a long time to wear him down, and you have to beat him three times, but you should be fine so long as you Cure often. You're probably going to want to be around level 50 before attempting the final battle.

SECRETS

SORA'S ULTIMAWEAPON

To acquire the strongest KeyBlade in the game, you need to visit the Combination Shop and mix together 21 different items. You'll need five Empty Stones, five Strength Stones, five Thunder Stones, three Full Love Stones, and three Wind Storm Stones.

UNLOCK BONUS MOVIE

There's a preview of *Kingdom Hearts 2* after you beat the game, but to unlock it, you have to rescue all 99 Dalmatians, win all four Olympus Coliseum Cups, obtain Sora's UltimaWeapon, complete the world map, and collect every possible Trinity, Ansem and 100 Acre Wood item.

MEDAL OF HONOR: FRONTLINE - FREQUENTLY ASKED QUESTIONS

I KEEP DYING. HOW CAN I REGAIN HEALTH FASTER?

Eat bread. Seriously. You'd be surprised how "strategically" located some of those stale loaves are. By the way, if mission five is a pain, look for the boiler room past the door marked "Barteraum"—that's German for boiler room. There's plenty of health and ammo in there!

IN MISSION TWO, HOW DO I GET TO THE DOCKS?

During the "Eye of the Storm" stage, you have to blow up the last supply truck in order to fashion a makeshift bridge.

I JUMPED OFF THE ROOF AND DIED!

During the "Operation Repunzel" portion of mission three, you're supposed to follow Gerritt off the roof and into some hay. Gerritt lands on his face and survives. You won't. Make sure to land in the middle of the hay!

MISSION 4, STAGE 3: ARNHEM NIGHTS:

This stage is cruel, isn't it? The trick: grenades. Find grenades, take cover, and throw your explosives at any group of Nazis you can find.

STURMGEIST IS A PAIN!

Yes, he is. That's why he's the last boss. Actually, it's his escorts that are the real problem. Use a sniping weapon to take them out and then attack him as much as possible before more appear.

I GOT A MEDAL. HOW DO I GET MORE?

You need to gather all of the gold stars available in each stage of a mission to get a medal for that mission.

HOW DO I GET GOLD STARS?

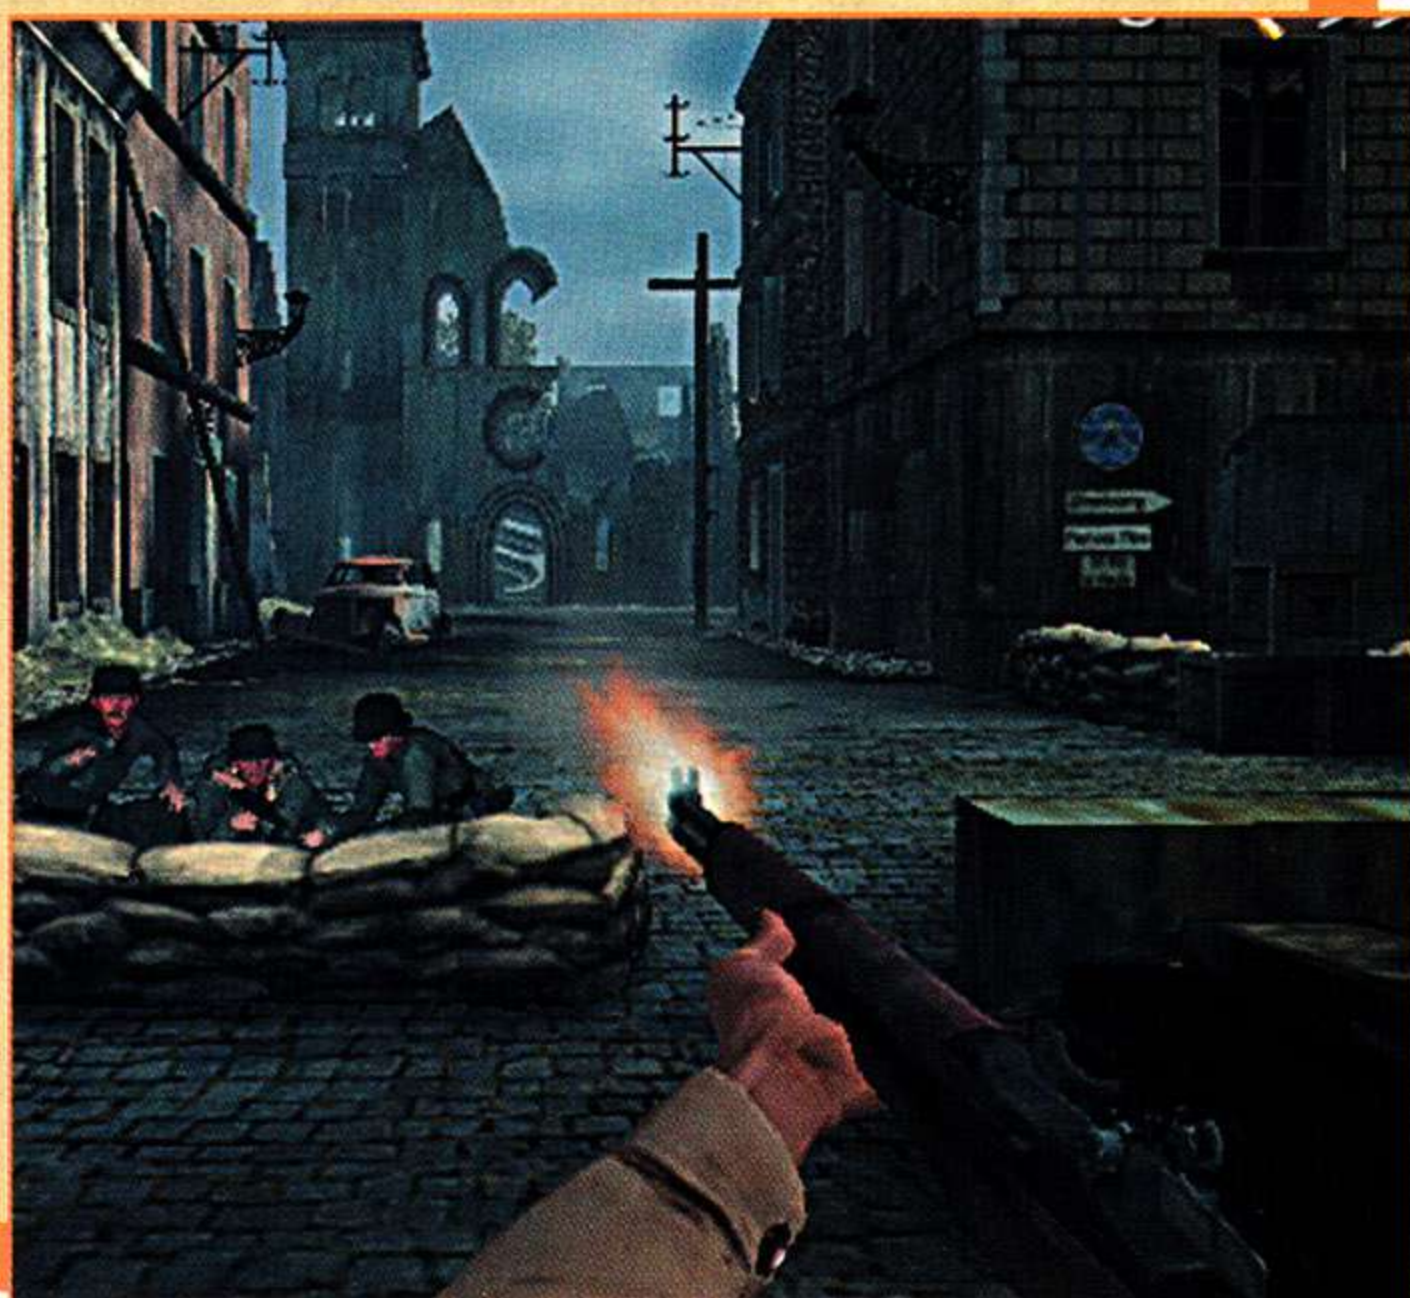

Finish a stage with more than three-quarters of your health and at least 95 percent of enemies killed. Some enemies don't spawn as you're going through an area, so you should backtrack to make sure you haven't missed any.

FREE MOVIES!:

For every level you obtain a medal on, you'll unlock "Making Of" and "History Of" videos.

THERE ARE STILL MEDAL SPOTS LEFT. HOW DO I GET THE REST?

You're awarded a medal after you complete the game. The medal you receive depends on your performance. Are you skilled enough to receive the Medal of Valor?

CASTLEVANIA: HARMONY OF DISSONANCE RECIPE FOR THE BEST EQUIPMENT

Oy, this game is packed full of spells, items and equipment. It's too full! We've gone through the entire game and figured out the combination of equipment that'll give you the best mix of defense and status enhancements. Best of all, we tell you where to get everything!

THE RECIPE

Whip - Platinum Tip - STR+20
 Body - Kaiser Mail - STR+5, DEF+75, INT+5, LCK+5
 Head - Red Silk Hat - DEF+25, INT+5
 Hands - Steel Gauntlet - DEF+25
 Legs - Platinum Shoes - DEF+25

THE LOCATIONS

Platinum Tip - Castle A: Corridor of Marble (above entrance)
 Kaiser Mail - Castle B: Castle Tower (need Crush Boots)
 Red Silk Hat - Shop near Entrance, for 9800g (both castles*)
 Steel Gauntlet - Castle B: Entrance, after you beat Cyclops Boss
 Platinum Shoes - Shop near Entrance, for 5000g (both castles*)

* To enter this shop, your EXP level must be over 50.

HELPFUL TIPS

Sell any gems you find back to the shops. That's their purpose.

Even though the Sun Armor is only rated for DEF+40, it will give you DEF+80 in Castle A.

The whip-carrying skeletons with gold tunics in Castle B (Simon Wraith) are great for EXP and tend to drop a lot of medium-sized health potions!

To unlock Boss Rush mode, beat the game once. To unlock Sound Test mode, beat Dracula with more than 198 percent complete. (See hints below.)

There are two really sneaky hidden rooms located within save rooms. One is in the lower left of the completed map. The other is just south of Clockwork Tower in the mid-upper section of the map. Use the Crush Boots and Crash Whip to access them in both castles.

To get all three endings, beat Maxim in both castles, and for the third battle in Castle B, make sure you have both JB's Bracelet and MK's Bracelet equipped.

"Ahh, the '80s. My dancin' shoes were a dancin' and my Camaro was a prancin'..."

GRAND THEFT AUTO: VICE CITY

DEVELOPER: ROCKSTAR NORTH

PUBLISHER: ROCKSTAR

PLATFORM: PS2

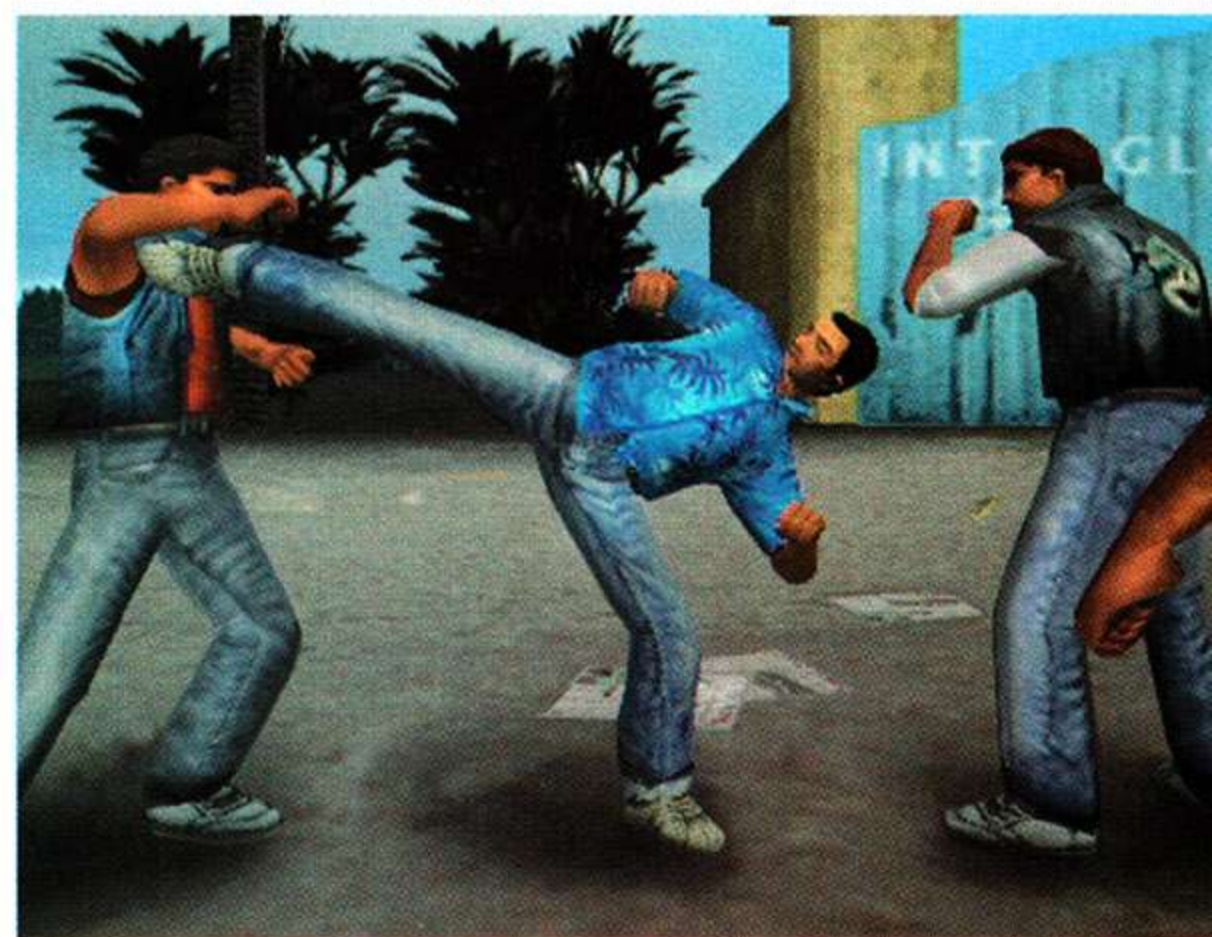

RELEASE DATE: NOW

GRAND Theft Auto 3 took the world by storm last year, and its repercussions are still being felt. Senators are up in arms about its violence, mothers are horrified to see Jimmy restoring his health by picking up a hooker, and ambulance drivers around the nation fear being car-jacked. (OK, maybe not that last one – Ed.)

Rockstar is hard at work developing a game to surpass its smash hit, and from what we've seen so far, this game looks like it's going to be a doozy. The game stars Sonny Forelli, another mobster who's intent on going from rags to riches the fastest way possible: crime.

Set in the glorified consumerism of the 1980s, *Vice City* features bright lights, a big city, slick cars and fast women. '80s hairstyles are everywhere, as are the classic tunes of the decade. Rockstar has licensed nine hours of music for the game (compared to *GTA's* three hours), including titles like Cutting Crew's "I Just Died In Your Arms." Vice City will be twice the size of Liberty City from *GTA3*, with 40 weapons to tear up the streets. In addition to the massive arsenal, an improved targeting system indicates the spray radius of the currently armed weapon. If you found yourself being shot to death in the *GTA3*, fear not: The new system locks on to the most threatening enemies first, letting you kill grandpa later. The tires of all the vehicles in the game can be shot out, thus adding another element to *GTA's* kill-and-run-like-hell gameplay. There are now more than 120 cars to steal (*GTA3* had only 50), and Sonny can duck for cover behind objects, steal motorbikes (*finally!* – Ed.), or nab a helicopter for an aerial view. If you'd rather not risk life and limb by working for the mob, don't worry: Rockstar has added tons of side missions, like pizza delivery.

Bottom Line: It's *Grand Theft Auto*, bigger and better. Just like the '80s.

"Support for Xbox Live? Now if only McDonald's delivered."

HALO II

DEVELOPER: BUNGIE
PUBLISHER: MICROSOFT
PLATFORM: XBOX
RELEASE DATE: CHRISTMAS 2003

THERE'S no question that *Halo* was—and indeed, still is—the killer app that helped put the Xbox on the map. A sequel has been planned, and although it's over a year away, a game of this magnitude deserves early recognition.

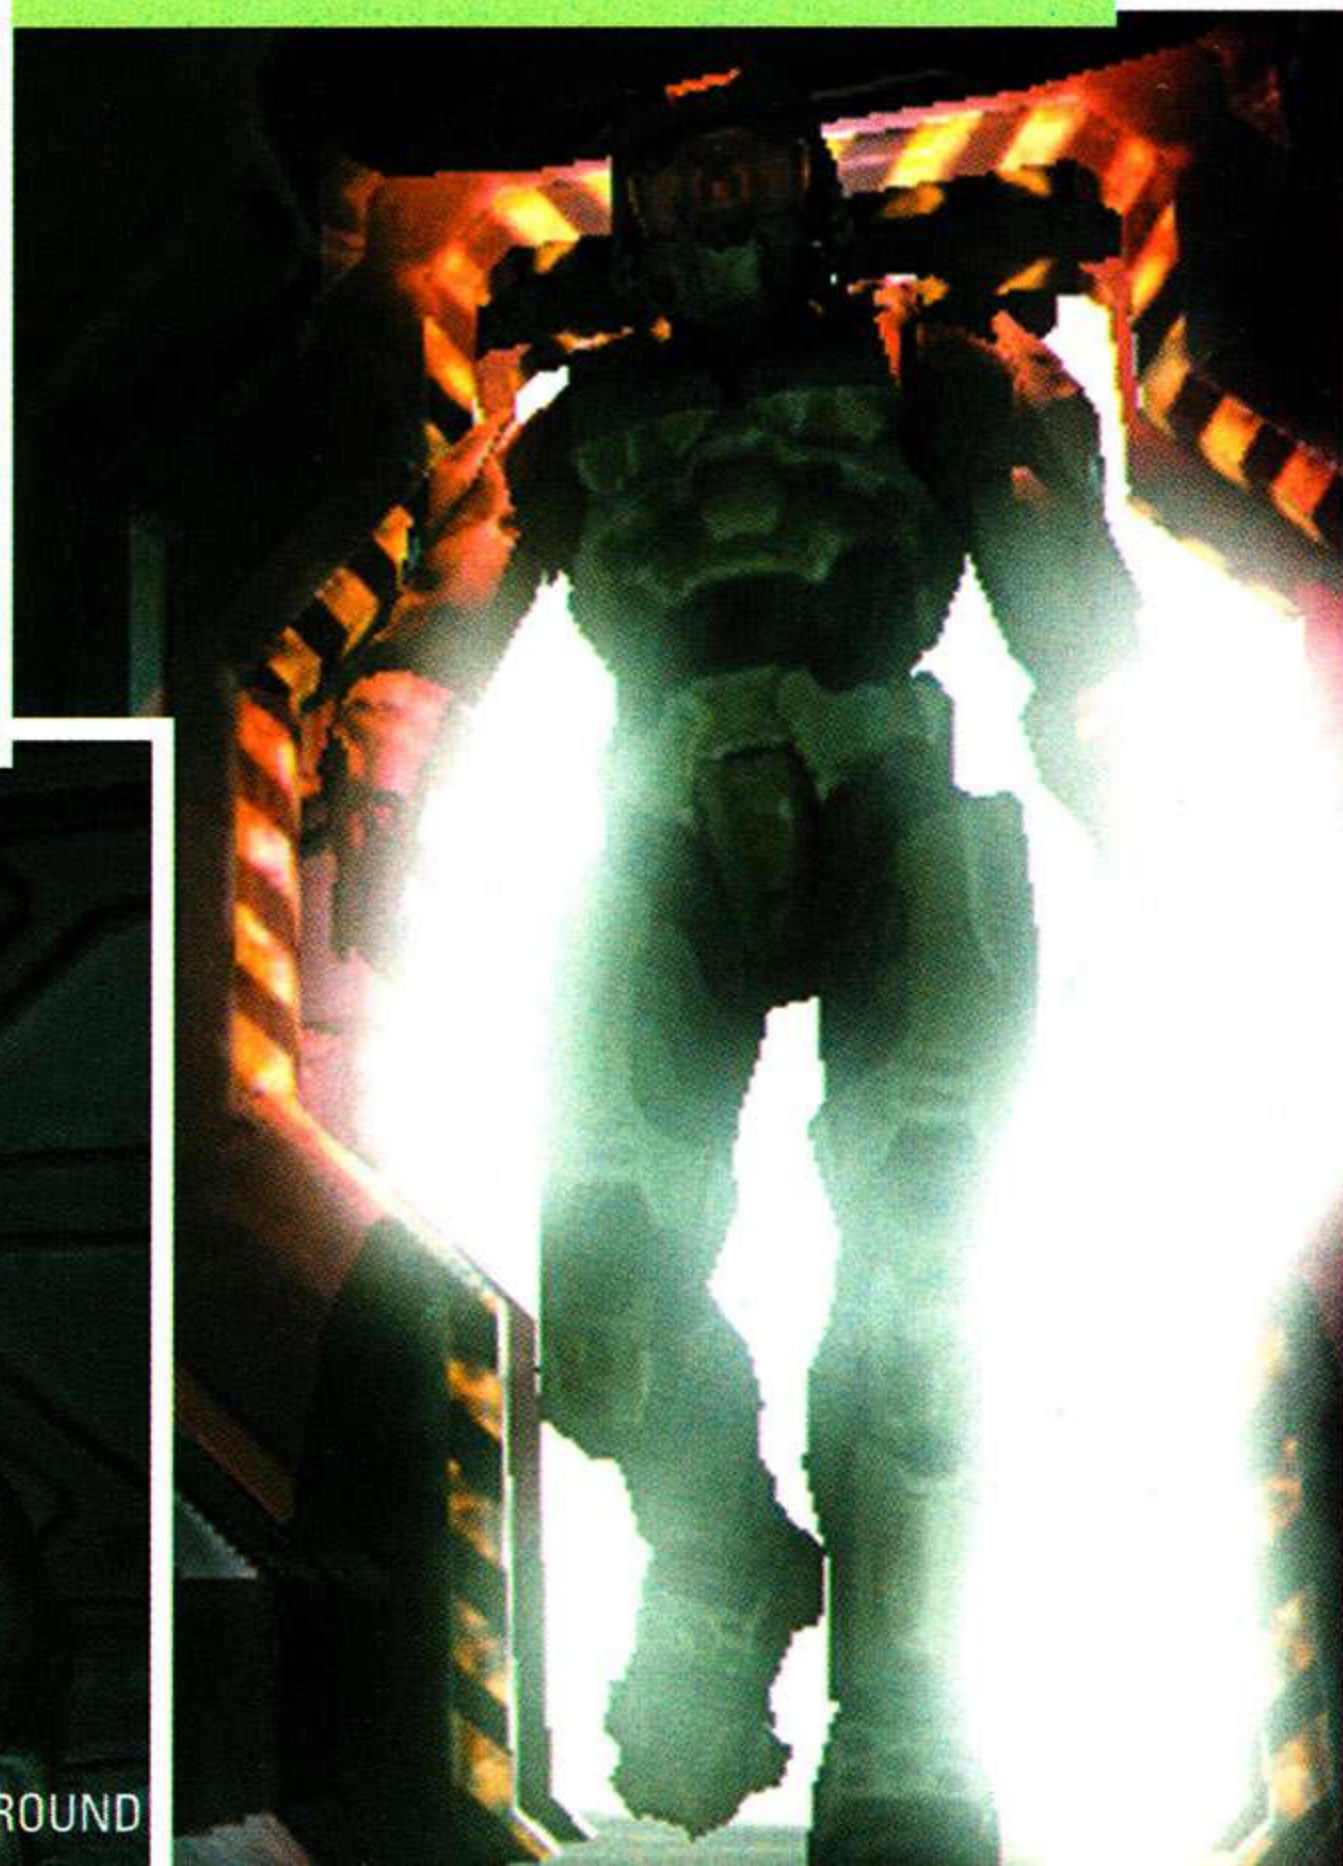

Halo II continues the battle between Master Chief and the Covenant, an alien race hell-bent on destroying Earth. While the developers at Bungie are tight-lipped as to what the sequel will entail, rumors have leaked out that the game starts off with

Earth being bombarded with nukes. Not the homecoming we had in mind.

What isn't speculation is what *Halo II* has in store for gamers. One of the game's engineering leads boasts that the title has a completely new graphics engine that "squeezes every drop of power out of the Xbox...with features so advanced we don't have buzzwords for them yet." A look at these screens shows that he's probably right. Not surprisingly, the game will feature new weapons, aliens and twice as many vehicles in which to tear around enhanced environments.

A mere sequel to *Halo* would be a blockbuster in its own right, but what we hadn't expected is that the title is going to have full support of Xbox Live. In other words, you'll be able to

play with a buddy online and chat with him via the headset. Imagine a battle where every member of your platoon is a player instead of an A.I. bot, where you can order your friends to flank the Covenant—or where he can hear your maniacal laugh as you stick a plasma grenade to his back. Get ready for action next Christmas.

"Plenty of hype, but where's the gameplay? If I want to be scared I'll turn the lights off in my bedroom before I go to sleep."

DOOM III

DEVELOPER: ID SOFTWARE

PUBLISHER: ACTIVISION

PLATFORM: XBOX

RELEASE DATE: LATE 2003

THERE were no true runaway titles at this year's E3, but *Doom III* definitely turned heads. The grandson of the game that revolutionized the industry and single-handedly created a genre is headed to the Xbox. (Thus ending the PC vs. console war...for now. — Ed.) Id programmer and founder John Carmack has announced that the Xbox version will match the graphical beauty achieved by the PC. As the E3 trailer revealed, Id has decided to retain its out-and-out mayhem-style shooting spree but add an aspect that's only been touched on before: horror.

With the rendering power of the Xbox behind it, the *Doom III* engine promises to scare the hell out of all who play it. With bodies that tumble down staircases to hounds of the dead that resemble leftover hamburger, *Doom III* might wrestle the coveted "Survival Horror" crown from masters

of the genre like *Resident Evil* and *Silent Hill*. Shadows reveal ominous creatures far before they're seen, so mammoth and hideous that they make the BFG seem like a pea shooter.

While there have been no announcements as of yet, we'd be highly surprised if Id's magnum opus didn't support Xbox live for multiplayer deathmatch and real-time screams of terror. Keep your eyes peeled for a future issue of VGU in which we dissect this bad boy.

Screens are from the PC version, but the Xbox version will be identical.

"YEAH! Men in rubber suits kicking the snot out of each other!"

WAR OF THE MONSTERS

DEVELOPER: INCOGNITO STUDIOS

PUBLISHER: SCEA

PLATFORM: PS2

RELEASE DATE: TO BE ANNOUNCED

VGU got a hands-on preview of *War of the Monsters* at Sony's Gamer's Day in San Francisco, and while it didn't run away with the show, it crushed other titles like *Jet X20* and the sequel to *Frequency*, leaving them like rubble.

Made by the creators of *Twisted Metal: Black*, this title features both 2D and 3D fighting, a sort of cross between *Power Stone*, *Rampage* and *Primal Rage*. From the opening black-and-white *Mystery Science Theater 3000* tin-can UFO and hand-painted posters boasting about the imaginary films from where the creatures supposedly came adorning the loading screens, it's clear that the developers are going for vintage 1950s sci-fi camp.

Players get to choose from one of 10 monsters, ranging from a Voltron-inspired robot, a gigantic praying mantis, a blob of electricity to a 100-foot prehistoric ape. All characters have long-range projectile attacks such as lasers and flying fists, as well as lethal in-fighting techniques like claws and oozing tentacles for punching, grappling and throwing.

While this type of game has been done before, Incognito is one of the first to actually do it right. When long distances separate combatants, the screen splits in two. Players can then choose to automatically lock on their enemies or run, jump or fly in any direction. When characters return to striking range, the game seamlessly melds the varying camera angles into a single point of view.

The other reason this title has us drooling with anticipation is the incredible level of environmental interaction. Players can climb a radio tower, tear off the spire, and spike an enemy with it. As a battle progresses, the level turns increasingly to rubble as cars are thrown, buildings are destroyed, and innocent bystanders are trampled. The game supports two players with an additional pair of A.I. bots standing in for your buddies if you're home alone or needing a few wild cards. Our only complaint: *War of the Monsters* won't take advantage of Sony's new network adapter.

"It's nice to see an FPS designed for the solo player, since that's what I am. Sniff!"

RETURN TO CASTLE WOLFENSTEIN

DEVELOPER: RASTER

PUBLISHER: ACTIVISION

PLATFORM: PS2, XBOX

RELEASE DATE: SPRING 2003

WHENEVER a game developer thinks of making a first-person shooter, there's one inevitable question that comes to mind: Who are we shooting? "Aliens? Bugs? Demons? Nazis? How about Demon-Nazis?"

Yet another PC title to make the leap to the console world, *Return to Castle Wolfenstein* is the sequel to a title that appeared on systems like the Jaguar, the PC and even Apple Computers. While the original plot had people trying to plant a bomb to kill Hitler, the new version is somewhat darker. The

game opens with the player hearing his partner-at-arms dying from electrical torture at the hands of an SS agent in the infamous castle. After revenge is served point-blank, the player must weave his way through dungeons, moats and spiral staircases, doing what he does best: killing, killing and killing.

Both versions will be as close to the PC original as the systems will allow, but Raster has already said that the PS2 version will suffer a few setbacks due to memory limitations. Not only will the Xbox version be nearly identical to the PC masterpiece, the game will support Xbox live for play over the Internet and real-time German taunting. Players will also be able to summon medical aid or call for air strikes simply by using the headset. This title hits stores next year, so be sure to brush up on your German until then. ("Achtung this, you freakin' Nazi!" — Ed.)

"If this game has poorly dubbed voice-overs, like in kung fu flicks, it's gonna rule!"

RISE TO HONOR

DEVELOPER: SCEA
PUBLISHER: SCEA
PLATFORM: PS2
RELEASE DATE: Q3 2003

COMING to the PlayStation 2 in just over a year is SCEA's new third-person action-adventure brawler that was unveiled at this year's Gamer's Day. *Rise to Honor* stars a motion-captured Jet Li who plays a martial-arts expert (*Really? — Ed.*) in what can only be described as a traditional Hong Kong action flick. Like the characters he plays in many movies, Jet Li can dispatch foes with spectacular kicks, punches and balletic gunplay.

Though many titles have gone down this path in the past, *Rise to Honor* has a level of environmental interaction that makes it stand apart. Instead of your typical *Final Fight* brawler where players pick up generic weapons like guns, knives and chains,

Jet Li is able to turn even the most innocuous object into a lethal weapon. In the kitchen-scene demo that SCEA showed us, Jet was able to throw people onto oven elements and hold heads underwater in the sink.

Not surprisingly, Jet is just as versatile with a pair of guns as he is with his feet. He is able to track multiple targets at the same time with a simple target lock, dive for cover behind crates and cars, then spring up a la *Time Crisis* and blast them into oblivion.

Our only complaint was that the combo Jet performed on his enemies became very repetitive after only a short time. Fortunately, the game is still early in development, so we can hope that SCEA will add a list of moves that are fitting of their star. We'll have a larger preview of this title in an upcoming issue once Sony releases more information. Unfortunately, Sony won't release further screens, so you'll have to make do with these.

"Dim the lights and add some Hendrix for a real trippy time."

ALTER ECHO

DEVELOPER: OUTRAGE GAMES

PUBLISHER: THQ

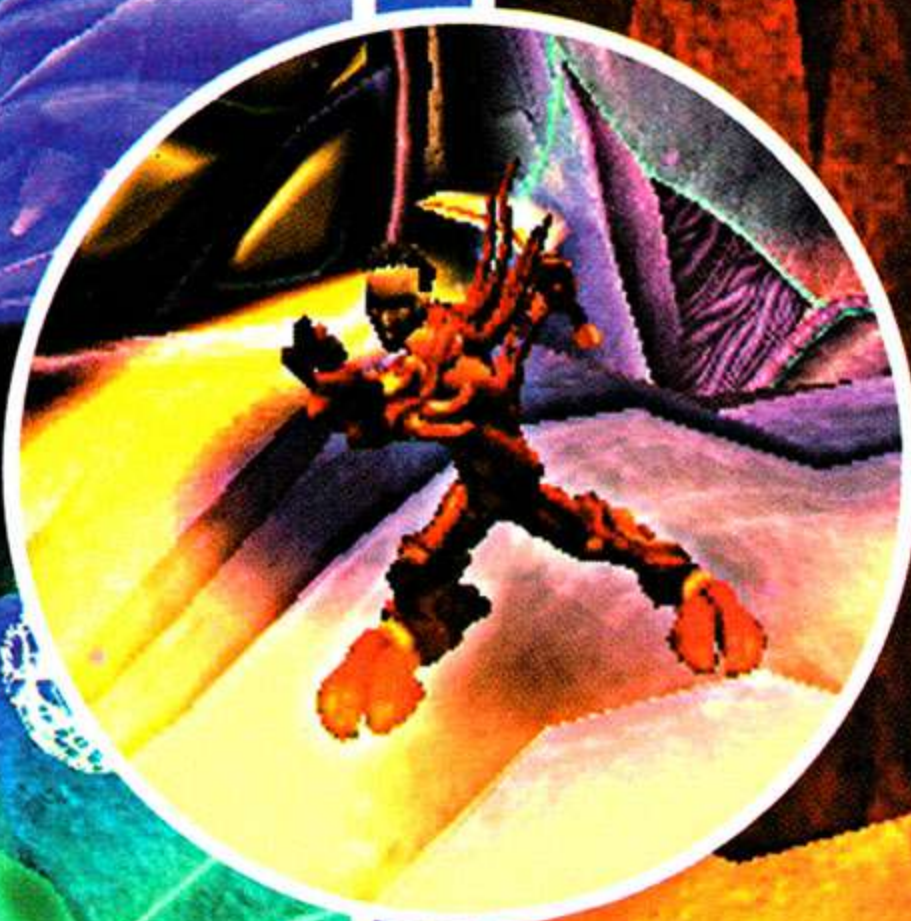

PLATFORM: PS2, XBOX

RELEASE DATE: Q1 2003

HITTING both the PS2 and the Xbox early next year is *Alter Echo*, a third-person action-adventure game with a unique twist. Players control a cartoonish figure named Nevin with unique armor called a PolySuit that allows him to morph into three different forms on the fly. Each being lets Nevin enter Melee, Gun or Stealth modes, whereby he can hack with machetes, transform himself into a walking gun, or climb walls and carry out assassinations while invisible. Even cooler is that Nevin employs a technique called Time Dilation where he can freeze opponents and then slaughter them while defenseless.

Despite his morphing and temporal abilities, Nevin remains the underdog. Outrage Games has created a planet where the surface itself is alive—and wants him dead. If that's not bad enough, there is no end to the enemies that Nevin will face: Given enough time, every foe will respawn. While the developers evidently think this is a great way to ensure tons of action (and, having created *Descent*, we think they know what they're talking about), we still can't help but wonder if its endless respawns will be cheap and unfair.

Visually, this title looks like a hybrid of *The Fly* and *Videodrome*, which suggests that Outrage binged on several David Cronenberg flicks during development. They've even gone so far as to create a new PostFX camera system to let them intensify the action with camera filters and screen distortions. We're hoping this title takes the industry down a new path toward temporal manipulation, but only time (*preferably not manipulated by Nevin* — Ed.) will tell.

"Maynard-sims, Maynard-houses, and Maynard-friends. Online!"

THE SIMS

DEVELOPER: EDGE OF REALITY

PUBLISHER: ELECTRONIC ARTS

PLATFORM: PS2

RELEASE DATE: WINTER 2002

THE most popular PC game of all time is heading to the PlayStation 2 courtesy of Edge of Reality. Chances are good that even if you're not a gamer or know someone who doesn't consider himself or herself a "gamer," you still know someone with a copy of this title. EA's runaway smash lets players control every aspect of their virtual beings from romance to health to building the perfect dream home. It's voyeurism gone digital, the ultimate reality show.

The PS2 version is going to be substantially different from the PC version, while still retaining all the elements that made it such a hit. For starters, the graphics engine has been completely rebuilt, letting players glide through the world of the Sims in true 3D. The control scheme has also been revamped for the Dual Shock, so telling your Sim to go jump in a lake is just as easy on the console as it was with a mouse.

This new version of *The Sims* has the classic "Sandbox" mode, where you take your Sim from next to nothing and raise him to be a millionaire with 2.5 kids and a three-car garage. But the developers have also added a new scenario-based, single-player mode that has a specific ending. The goal of this mode is to manage your Sim through specific "life events" such as marriage, children or the loss of a job. Doing so unlocks more items and people for your Sim to interact with, and new PS2-only items have been added.

New to the title are both cooperative and competitive two-player split-screen modes. In the first, players simply try to get through their digital lives together without degenerating into petty squabbles. The competitive mode pits players head-to-head to see who can more quickly negotiate their way through life's little tests. The individual Sims, as well as the worlds they have created, can be saved to a memory card and transported to a friend's PS2 for a vacation. (*No wonder EA has made a fortune on this title. It's life for gamers who have none.* — Ed.)

DARK CLOUD 2

DEVELOPER: LEVEL 5
PUBLISHER: SCEA
PLATFORM: PS2
RELEASE DATE: Q1 2003

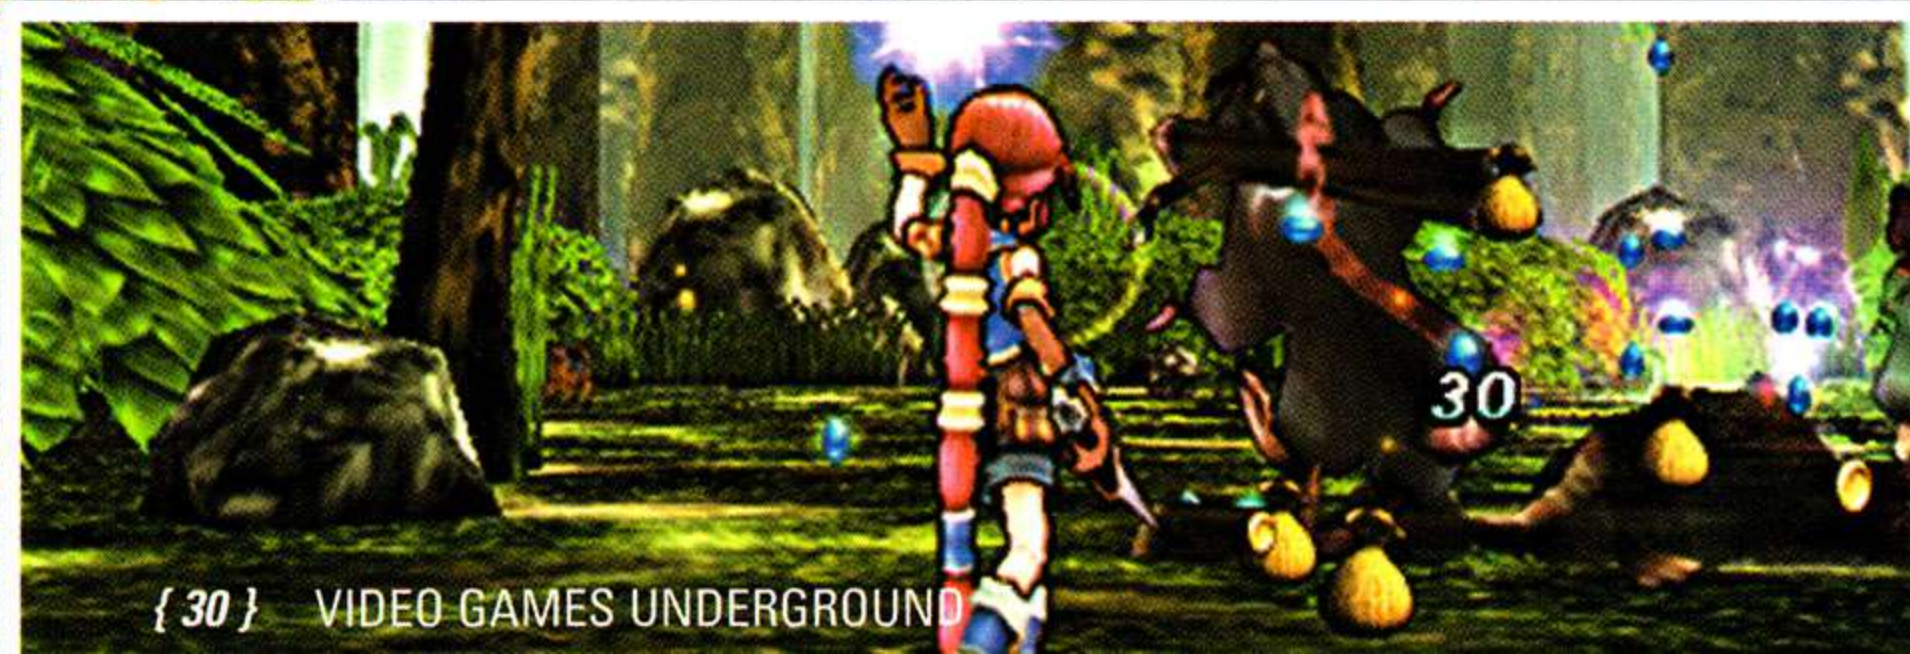

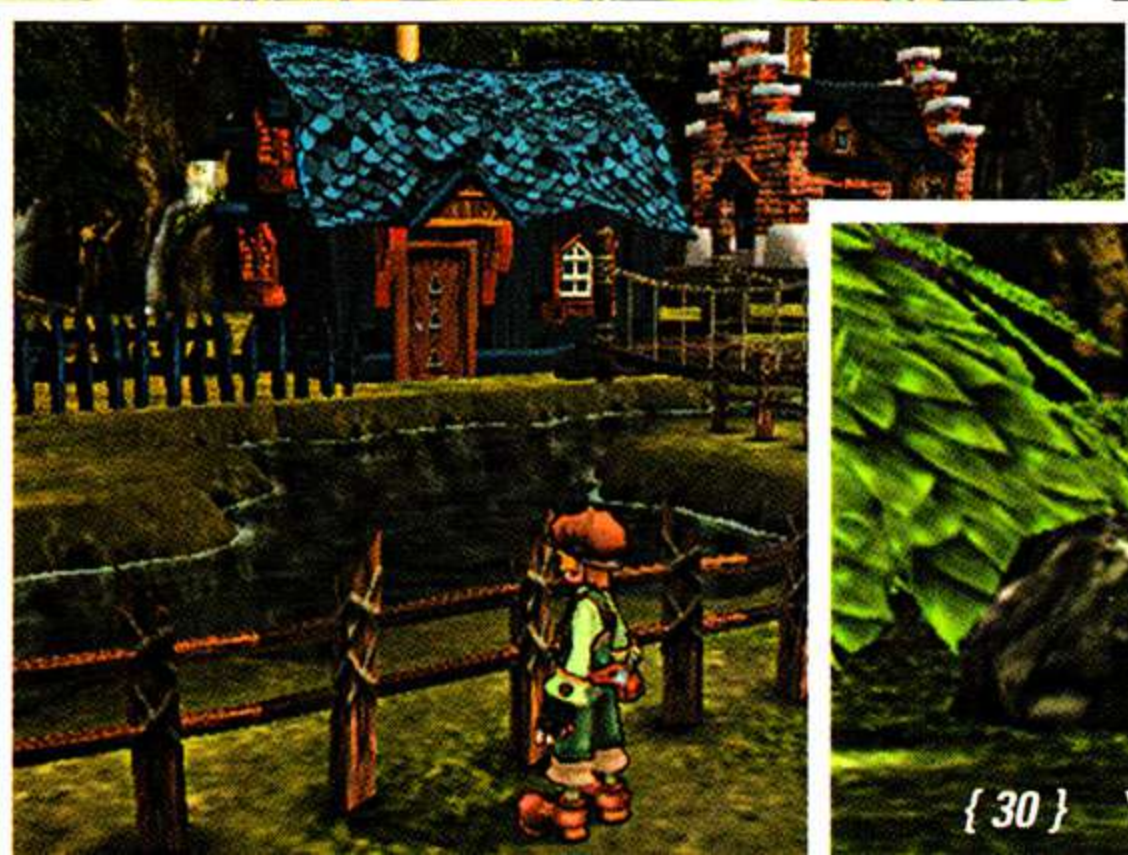

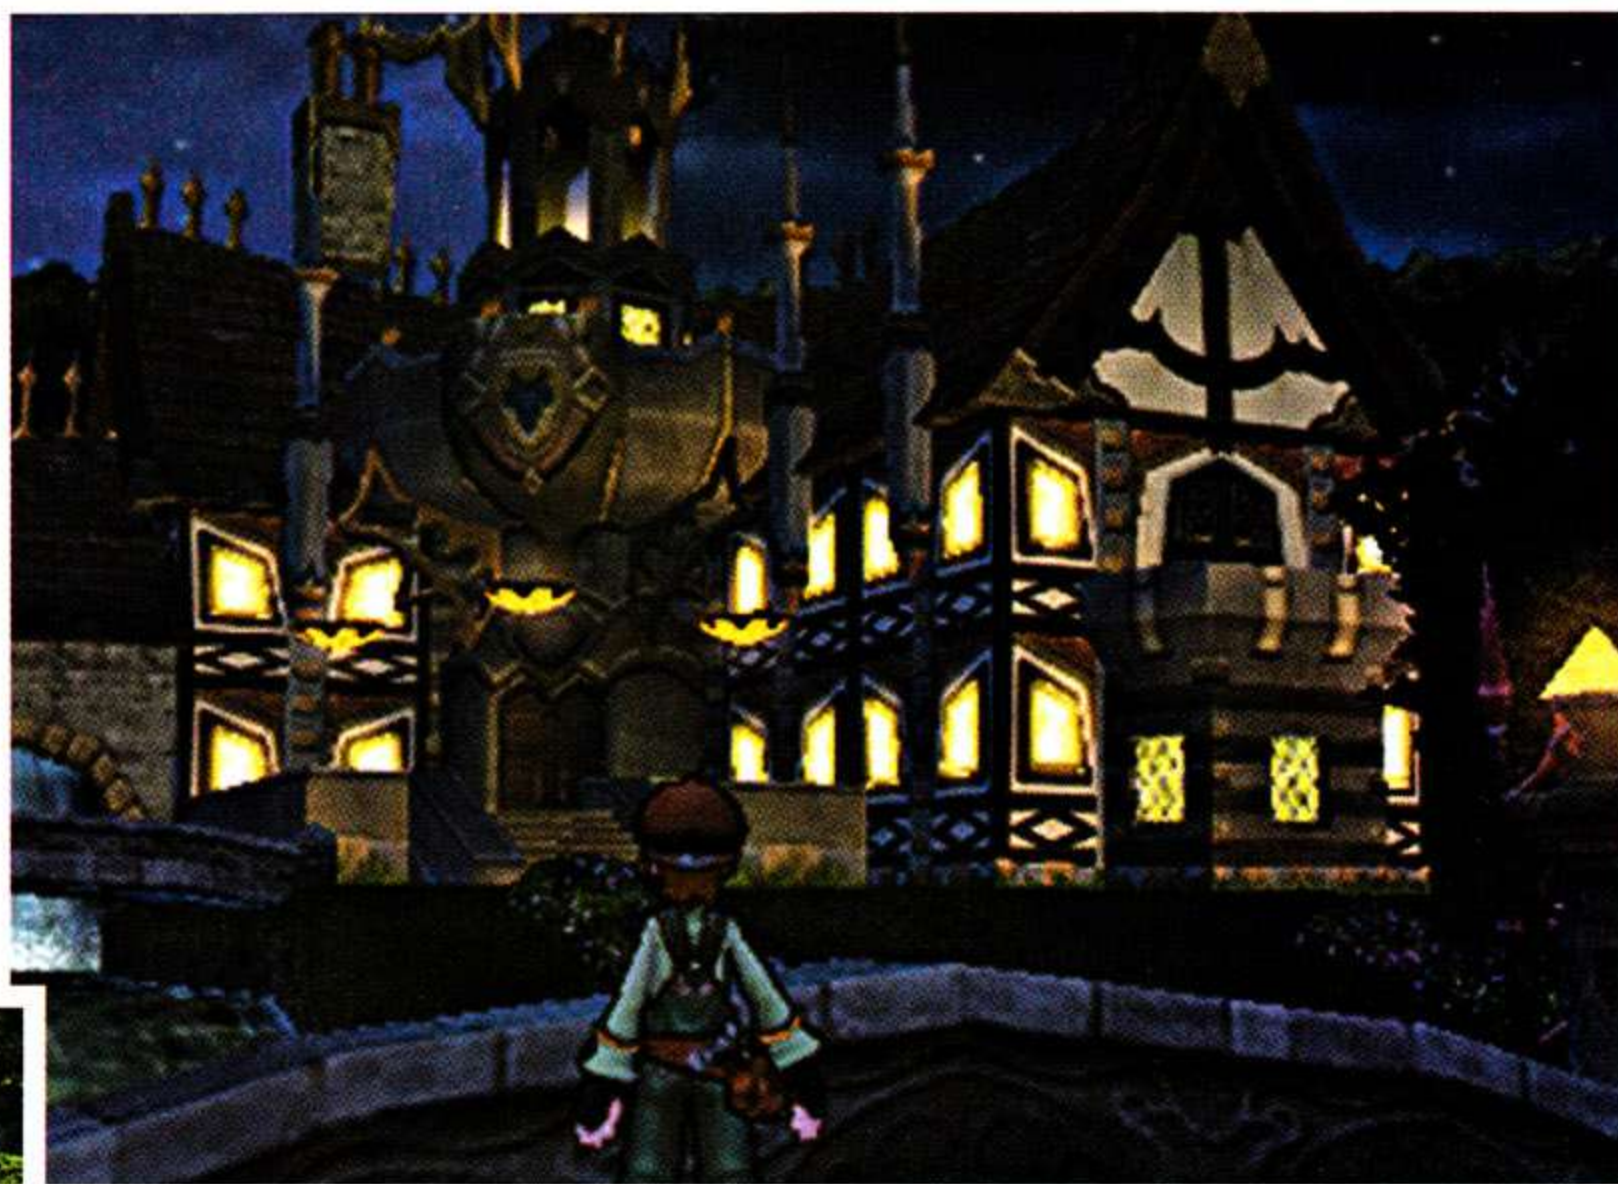

WE at VGU could barely believe our eyes when we saw the first batch of screenshots for *Dark Cloud 2* (previously known as *Dark Chronicle*). Instead of continuing with animated polygonal characters, Level 5 has decided to jump on the cel-shading bandwagon that is sweeping the gaming industry. So, yes, this *is* *Dark Cloud 2*. It has the same play mechanics as the first: hack- and-slash dungeon crawling, weapon enchantment and Georama village building. It just looks completely different. (*We're still not convinced.* — Ed.)

The game tells the story of Max, a young boy venturing through his world to overthrow evil and restore order. Unlike the first title, which was a solo adventure, Max has help on his quest from a feisty redhead who comes off as a cross between Lara Croft and Pippi Longstocking. Little is known about her at

this point, other than she is a completely playable character. Level 5 has bestowed voice acting for significant cutscenes, but in-game conversations will remain as on-screen text.

The game's 3D targeting system has been revamped, making combat much easier than in the first title. Jamming on the attack button will result in a string of hits that can be chained together, but the chains can be interrupted by attacks from enemies. Think of it as a cross between *The Legend of Zelda* and *Killer Instinct*.

The main failing of the original title was the amount of tedium put into upgrading a weapon, only to see it break and have to start over. There's been no mention as to whether or not Level 5 will improve upon this system, or whether or not they consider PS2s thrown out of windows in frustration to be positive feedback. However, the Georama system has been substantially upgraded, and the battle system now indicates the locations of enemies and treasure in real time. Seems that Level 5 has been listening after all.

"This game is out there, man. Way out there. Way, way out there..."

PSYCHONAUTS

DEVELOPER: DOUBLE FINE PRODUCTIONS

PUBLISHER: MICROSOFT

PLATFORM: XBOX

RELEASE DATE: Q3 2003

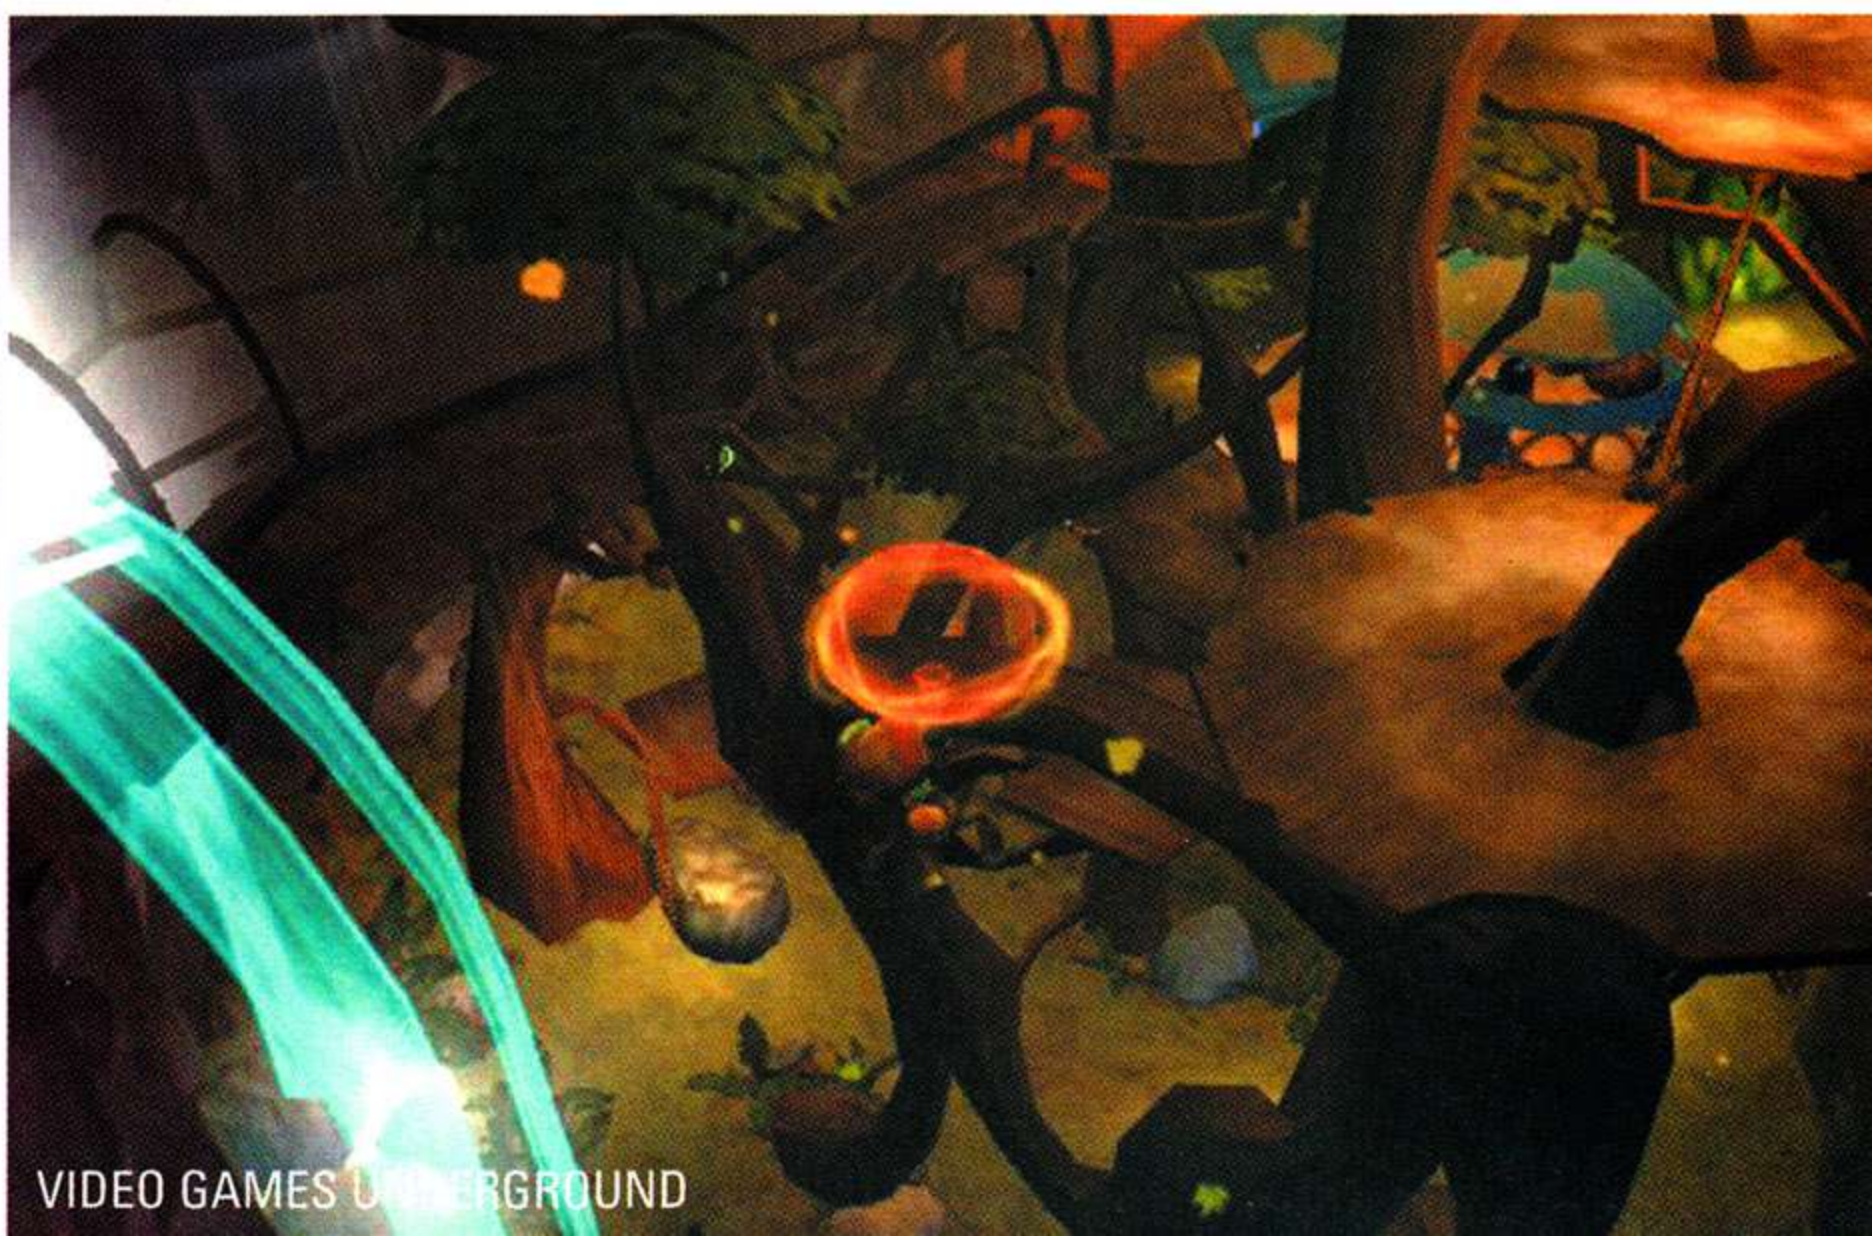

VIDEO games have constantly improved their graphics, sound and storytelling. Now that the power of a system no longer troubles developers, they're free to play with the minds of their gamers, as *Eternal Darkness* did on the GameCube. But Double Fine Productions isn't content to toy with a single mind. They want to explore dozens.

Psychonauts tells the bizarre tale of a young boy named Raz, a student at a summer camp for the mentally gifted. While Raz is hard at work earning merit points toward his Cub Scout-esque badges in trades like telekinesis, levitation, pyrokinesis, prophecy, invisibility and teleportation, a group of madmen appear at the camp and start kidnapping its young students. It's up to Raz to stop them—and here's where Freud would have a field day—by entering their minds.

The title lets Raz run rampant with his PSI abilities. Everything he has learned in camp he can apply to the "real" world of the game. Raz will have to explore every nook and cranny of the kid-nappers' minds, and this is where things get interesting. For example, if a character in the game has a fear of dogs, you'll encounter a massive canine as a level boss.

The worlds in *Psychonauts* differ wildly because the kidnapers each have unique psyches. This translates to gameplay by having Raz explore dark, twisted worlds that look like they came from the mind of Tim Burton, a sort of *Nightmare on Xbox*. Imagine *Super Mario Sunshine* on LSD, and you'll get the right idea.

While we're not exactly thrilled with the idea of yet another dull platformer hiding behind a cosmetic gimmick, the psychic abilities that Raz employs could make *Psychonauts* stand out from the current crop of Xbox titles. Will it make its way to the forefront of the industry's consciousness, or will it be repressed like a bad memory? The game is still a long way off, so check back for a more thorough preview in an upcoming issue.

Hello Trooper! Welcome to the Robotech Defense Force! My name is Sgt. Maynard Tuck! I will be your drill instructor! The first and last words out of your mouth will be "sir"—you got that?! ... Good! I am here to give you the instruction that will save your life in a combat situation.

Our enemies, the Zentraedi, have set out to destroy the Earth. As a Veritech Fighter Pilot, it will be your job to stop them—and stop them all. You got that!? All right, now listen up...

By Maynard Tuck

COMBAT MODES

The Veritech fighter is a state-of-the-art weapon. It can assume three different combat modes and possesses the ability to launch missiles as well as carry objects.

FIGHTER

The Fighter mode has the fastest boost speed and the strongest missiles, but you can't carry anything and close-quarters combat is difficult. You can launch missile decoys with your special weapon.

GUARDIAN

The Valkyrie's Guardian form is slower than the fighter and its missiles are weaker, but your aim is more accurate, you're more maneuverable, and you can carry things.

BATTLROID

The Battloid mode is your robot mode. You can't fire any missiles, but your secondary weapon will shoot down any incoming missiles that're coming toward you. Use the left and right triggers to strafe and avoid enemy gunfire, and don't forget that you can snipe as well.

Maynard's Advice: Use the Fighter mode to travel quickly and to fly through oncoming missiles and the guardian mode for when you need more maneuverability in close combat. The Battloid mode is best suited for ground battles where you can dodge fire by strafing side to side.

UPGRADES

Hear me now and believe me later! With these upgrades, you... will... be... un-stop-uh-bull!

	WHAT IT DOES	WHERE YOU GET IT
ARMORED VERITECH	Massively increases your armor and missiles, but at a very severe cost to speed and agility. Unfortunately, you can only select it in Versus mode.	Destroy 625 Battle Pods

CHAPTER 1

MISSION 1 - BOOBYTRAP

Fire volleys of missiles and use your guns to take out two first waves of Zentraedi ships. Transform into Guardian mode if a bogey tries to tailgate.

MISSION 2 - COUNTDOWN

You'll be fighting against Battle Pods in the streets of the city—so stick to your Guardian and Battloid modes. The Guardian mode is best. Use your missiles to quickly mop up multiple pods.

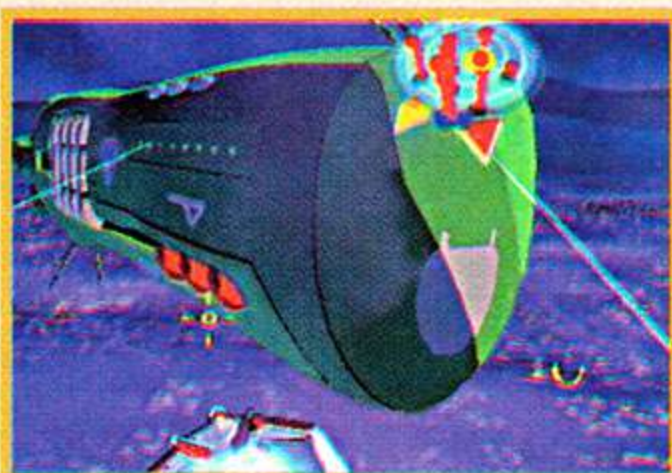

For the second portion of the mission, help the Destroids combat the Zentraedi pods with your Guardian's missile volleys. Switch to Battloid while your missiles recharge and confront the aliens head-on.

STOP!: The bronze, silver and gold cross awards require that you slaughter hundreds of Battle Pods. Replay Countdown 10 times or so in order to cinch these medals and the Armored Veritech quickly.

MISSION 3 - BURSTING POINT

The SDF-1's omni-directional barrier won't last long against a Cruiser! Forget the fighters for a moment and fly in close to that Cruiser. Use missiles to destroy the laser pods on the front and starboard side. Now, deal with the fighters.

MISSION 4 - FORCE OF ARMS

If you take out the guns on the main Zentraedi warship, this battle will be relatively short.

Afterward, use your Fighter's missiles to take out the Battle and Fighter Pods. Don't forget to tap the targeting system in order to acquire new targets.

To defeat the enemy ace, swoop toward her with the Fighter and volley missiles, then

use the Guardian mode to turn around and strafe for another pass. As nutty as it sounds, you'll survive if you stay close.

CHAPTER 2

MISSION 1 - AMBUSH HILLS

This mission is laughable. Use your Battloid form to shoot the Zentraedi and strafe when they return fire. Guardian missiles work well against small groups.

MISSION 2 - TROUBLE IN GRAYSTONE

Multiple waves of Battle Pods and Zentraedi giants will attack the civic center. You have to kill them all. To succeed, you must master the quick change between the Guardian (D-Pad Down) and Battloid (D-Pad Left) forms. Use the Guardian to swoop to the next attack group and to launch missiles at them before they're too close to the civic center. Do not be afraid to fire a full volley.

MISSION 3 - SPECIAL DELIVERY

Protect the delivery choppers. Stay in Guardian mode and keep twitching the targeting stick to launch volleys at the Zentraedi below. Try to stay ahead of the choppers and use the Fighter mode to boost. Keep your finger tapping the machine guns as well.

MISSION 4 - DESTROIDS IN DANGER

Step 1: Secure the compound. Hover in Guardian mode and keep targeting the Zentraedi as they approach. Your missiles will defeat the majority. If any snake by, shoot them with your guns. Master the ability to spin and retarget.

Step 2: Recover the three supply crates. Prior to the last crate, enter Snipe mode once you round the hill. Zoom in with the scope and take out some Zentraedi before they even know you're near.

Step 3: Rescue the Tomahawk pilot. He's past the train tracks. Use your Fighter mode to get there quickly and take out the Zentraedi with missiles. Land near the Tomahawk and shoot the incoming Pods as they reach the hill. When it's all clear, pick up the pilot and head back to base.

Step 4: Secure the compound again. It's the same as step one, but your passenger prevents you from transforming. Just hover and use missiles and machine guns.

MISSION 5 - UNWANTED GUESTS

Kick back and stretch your wings for a plain air battle!

MISSION 6 - DARK SKIES

Fun fun: It's time to take out a Zentraedi Scout Ship. Ignore the Fighter Pods and concentrate on destroying the gun turrets on all sides (and bottom!) of the ship.

MISSION 7 - FLOOD CITY

Ignore the permission advice! Fly into the city and leave the first set of Battle Pods alone. Once you discover the Scout pods, take 'em out. With them out of the way, you can ferry the three survivors to the drop zone. Now, you can take out those Battle Pods. There are three waves; one at each intersection. Make a beeline between the roads and buzz past them in your Guardian form to shower them with missiles.

STOP!: Replay Flood City approximately 10 times in order to destroy the 50 Scout Pods necessary to unlock the Female Power Armor vehicle. You could also repeat CH3/M11 or CH4/M4 a few times.

MISSION 8 - KNIFE'S EDGE

Switch to Guardian form and follow Skarrde. When you catch up, get close and hold down one of the strafe buttons. He won't be able to hit you with his lasers while you circle. In the next clearing, he'll have Battle Pods on his side. Move slowly ahead and take them out with your missiles first, then resume the strafe-dance.

At the end of the level, Skarrde will sit in the middle of a concrete pool. You can get in close and strafe-shoot, or you can hang back and lob missiles with the concrete as a shield.

Chapter 3

MISSION 1 - REBEL REVENGE

Hover in front of the factory in Guardian mode and volley missiles at each wave of Zentraedi. Each squad will have two Battle Pods and two or three grunts. After a dozen waves, you'll travel through the city to hunt the remainder. Proceed carefully and go nuts with missiles.

MISSION 2 - SABOTAGE

Stop. Pull back down the street. Transform into Guardian mode and use the buildings for cover while you cautiously lob missiles at the turrets. Once you've destroyed the eight turrets on the front, float to the intersection and head left. Stop at the corner and lock onto the faraway Zentraedi, then aim for the road you started from. Three more Zentraedi will appear. Take them out, then slowly strafe-float around the ship for the other two turrets. After that, take care of the random soldiers.

MISSION 3 - CALL TO ARMS

A deceptively simple protect mission. Hover over the armory and use your missiles to take out Battle Pods. The armory can take a massive amount of punishment. After a few waves of Battle Pods, you'll have to help Hiro over to his Tomahawk. Pick

FLAT LINE LOW NEUTRAL HIGH INSANE

him up, drop him off, and return to finish off the Battle Pods. In order to save the factory workers, use the mountain to sneak up to the Battle Pods and then snipe the gate.

MISSION 4 - POWER STRUGGLE

You have to destroy every single shuttle—16 in all. Don't stay in the compound and don't hover in the clearing, because the Battle Pods keep respawning. Fly around in your Fighter mode and target a shuttle, then volley four sets of missiles. Once you trash one, transform into Guardian, turn around, and then back into Fighter mode to hotfoot it to the next shuttle. This is a relay race! The VF-1A and VT-1D are best, since they have more armor.

MISSION 5 - CAT SCAN

Your Fighter's Decoy Chafe is all you need. Keep firing it near the Cat's Eye to attract all enemy fire. Use the Guardian mode to slow down so you don't overshoot and keep firing Decoys. You need to last two minutes past the point of orbit.

MISSION 6 - TRIAL BY FIRE

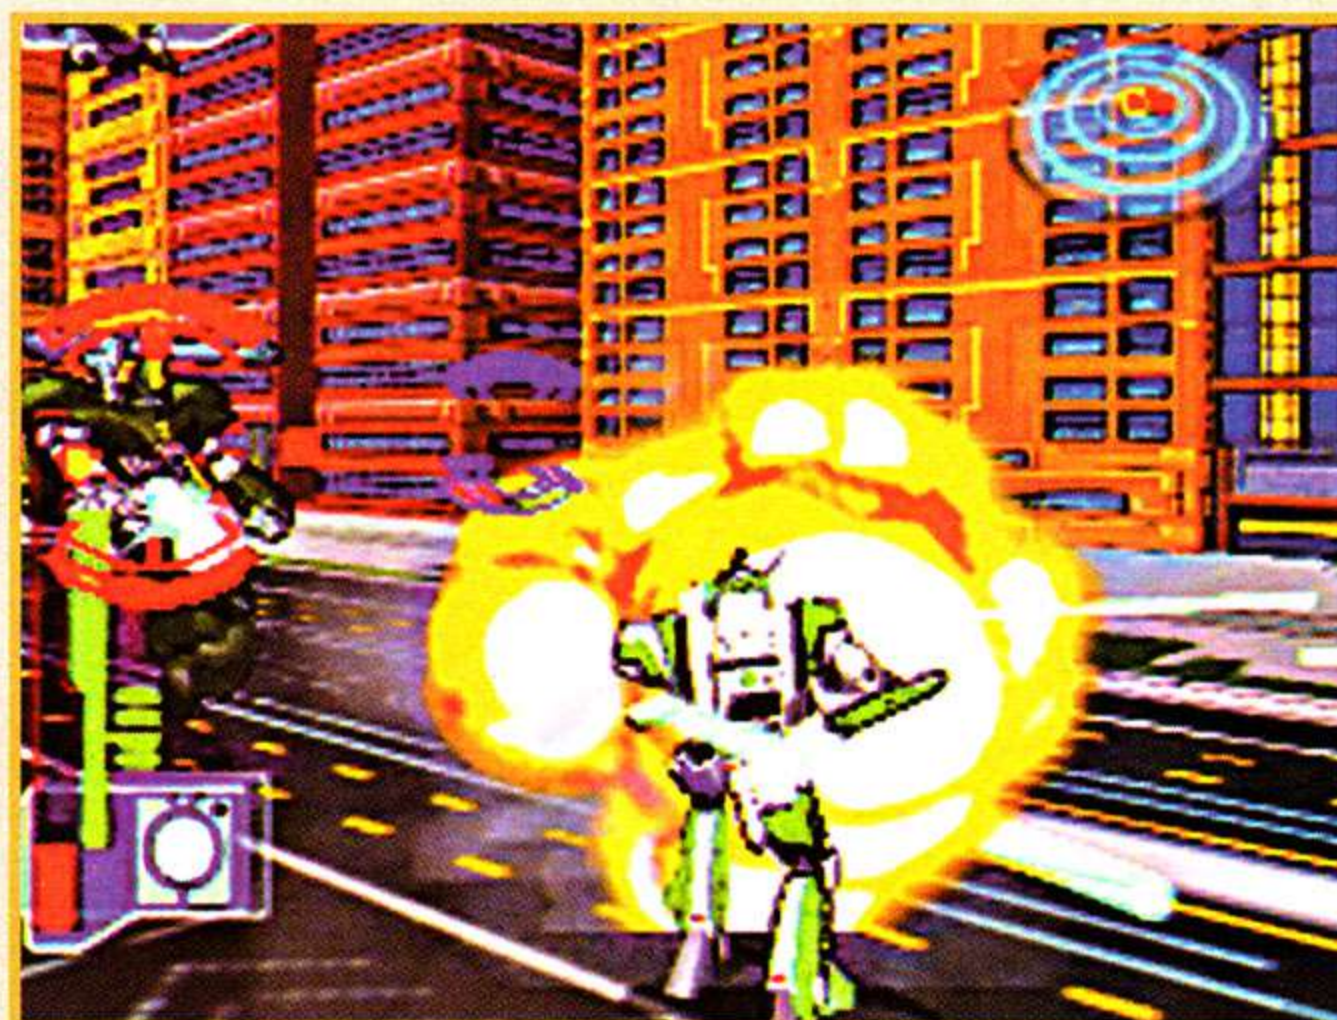

This is, by far, the toughest mission in Chapter 3. You have to defend the Cat's Eye with a potent offense and destroy everything until it clears the atmosphere. The most important thing to remember is the Fighter Pods are fast and can fire more missiles than Battle Pods, which means they are the greatest threat to the Cat's Eye. Fly behind the Cat's Eye at a medium distance in Guardian mode and use its auto aim and missile features to take out the pods. About halfway through, Male Power Armor Pods will join the fracas. Again, you need to make sure no red dots stay near the blue dot on your radar. The VT-1D is a good model for this mission.

MISSION 7 - HOSTAGE CRISIS

Hotfoot it to the intersection and destroy all Battle Pods there and in the next clearing.

Watch out for the Power Armor "Sniper" just past the smoking ruins. Strafe and fire in a circle to avoid its cannons. If it stays perched atop a building, use one of the other buildings as cover and snake missiles around.

Fly ahead and clear out another few waves of Battle Pods.

When Chase cuts in to discuss the gate, hold position behind the corner and slowly move right in Battloid form. Snipe the Battle Pod and then transform into Guardian mode to take out the next two waves of Battle Pod attackers. Watch out, there's another "Sniper"—keep moving to avoid his shots. Once he's gone, fly around the fence and destroy it with your sniper rifle to continue.

MISSION 8 - DARING RESCUE

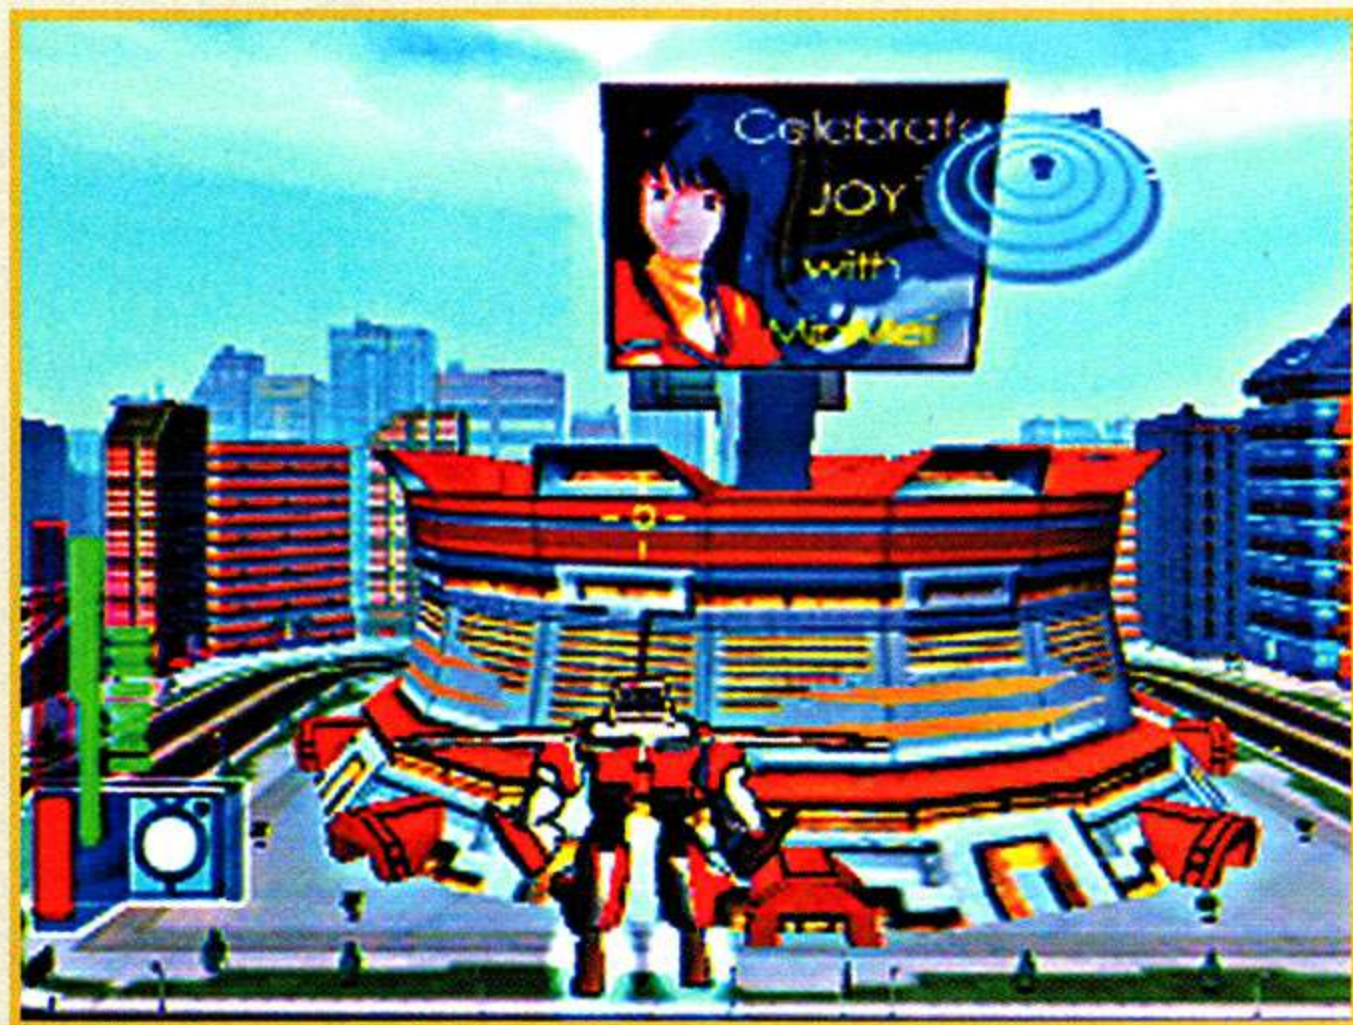

The Battle Pods aren't the problem. The problem is those darn Male Power Armors with sniper capability. Move cautiously in Battloid mode and stop when you see a non-moving red blip on your radar. Line up with the dot and enter your own snipe mode to instigate an attack. Quickly transform into Guardian mode to finish him with missiles. There are five in all. Don't forget to smash the construction gate so the trucks can pass.

MISSION 9 - PARTY CRASHERS

Help Lt. Rick Hunter fend off three large waves of Fighter Pods. Continually boost and barrel roll to avoid their missiles and use your own missiles and guns to shoot them down. A Scout Ship and four Power Armors are the last obstacles—take out the scout first! Rick can give and take a great deal of punishment, so don't be afraid to regroup.

STOP!: Replay Party Crashers three times to earn the Jolly Roger medal and unlock the Skull One paint design.

MISSION 10 - THE ROAD TO RUIN

Use missiles to destroy Battle Pods. Switch to Guardian mode and take Minmay to the concert hall. You only have 60 seconds, so don't try to fight along the way. To protect the concert hall, stay in Guardian mode and remember that you can perform multiple lock-ons by keeping the missiles button held.

MISSION 11 - DEADLY STORM

Use your Battloid mode to shoot Kiyora's missiles before they hit Izzy and use the Guardian form to keep gunfire and missiles trained on the Zentraedi pilot. If she is flying out of your reach, use the Fighter to catch up to her. She can easily dodge its missiles, but not if she's busy with Izzy. One trick to keeping Izzy out of danger is to quickly transform from Guardian to Fighter and launch a decoy toward her, then quickly transform back into Guardian mode.

MISSION 12 - GRAVEYARD

A walk in the park, soldier! Fly ahead, transform into Guardian, grab Izzy, and drop her off on land. Now beat Kiyora within an inch of her life. Fire missiles in Guardian mode and master the quick change into Battloid mode to neutralize her

missiles. If you get too close, use the Fighter mode to zoom away, spin around, and continue the attack.

MISSION 13 - LITTLE MESA MASSACRE

This mission will test your snipe ability. Remember: You need a fully charged shot to destroy a Pod. Switch to Snipe mode and take out the Scout on the hill. Zoom back and do the same with the one to the right. Transform into Guardian and fly forward to the bend. Switch back into Battloid and snipe the Scout on the right and then quickly the one on the left. Do not fire missiles yet or you will be discovered.

For the five Scouts in the base, volley with multiple missiles and take them out as a group.

Zoom to the bridge in Guardian mode and take out the Battle Pods. There is a Re-Entry Pod down the path to the right and one to the left. You have to destroy them, but take care of the Battle Pods too or Hiro will be toast. There are roughly 10 Re-Entry Pods to destroy. Keep the same strategy until Hiro arrives at the bunker area. Now, sit in front of the bunkers and destroy all Battle Pods and Re-Entry Pods. Watch out for the Re-Entry Pod hidden in the pocket left of the four main Pods near the bunkers.

MISSION 14 - THE ENEMY WITHIN

You have to protect Skarrde from Hiro's missiles. Transform into Battloid mode and face Hiro from the side. Use your alternate fire to destroy his missiles and attack with any means necessary.

Chapter 4

MISSION 1 - GOODBYE GRAYSTONE

Remember your perimeter training. For the first phase of this mission, position yourself at the point where the road enters town. For the second, head to the south road and do the same. For the last phase, hover right above the choppers and

take out the Battle Pods and Re-Entry Pods. Stay low and near hills to shield yourself from missiles and destroy the Re-Entry Pods ASAP in the first two parts of the mission. When it comes time to protect the helicopters, only focus on the Battle Pods—the Re-Entry Pods take off after depositing one or two waves.

FLAT LINE LOW NEUTRAL HIGH INSANE

"Why doesn't someone make a classic Transformers game?"

MISSION 2 - NARROW ESCAPE

All right, Lieutenant! It's time for an escort mission! Stay in Guardian mode and fly a few clicks ahead of the choppers in order to intercept the Re-Entry Pods and ground units. There is one point where a Re-Entry Pod sneaks in behind the choppers. Once you reach the final clearing, take out the two Re-Entry Pods and the ground units. The units on top of the mountain are endless.

MISSION 3 - BURNING BRIDGES

Yes, I hate protect missions too. Destroying and damaging Fighter Pods is your top priority. They're the ones packing the most missiles. The bridge also has missile defenses, but they're not powerful, so you need to weaken the Fighter Pods a little. Destroy Re-Entry Pods when you can, but if one slips through, the Battle Pods they let off are a more important target. A good spot to hover in Guardian mode is at the end of the river where the Fighter Pods appear.

MISSION 4 - DOUBLE AGENT

Success in this mission requires street smarts. Mop up most of the Zentraedi on your way to the double agent's position. That way, you won't have many to fight on the way back. Next, high tail it back to the base and forget about combat unless you need to plow the road. After you drop off the capsule, defend the base for 60 seconds.

MISSION 5 - HIDDEN AGENDA

Hunt down and destroy all Scout Pods. You can ignore or fight anything else and there is no time limit. Scout Pods cannot fly, so look for them to be parked atop large debris.

STOP!: If ya didn't unlock the Female Power Armor yet, Double Agent or Hidden Agenda will give you the necessary kills in only one or two plays.

MISSION 6 - MUTINY

Another easy trial, soldier! Use your Guardian mode and its missiles to make short work of the shuttles. When only the last one remains, take it out with your guns. Now flip around and take out those lasers on the Zentraedi carrier. They pack a punch, but your missiles and guns can make short work of them.

MISSION 7 - BACKLASH

Argh! It's CH2/M4 "Power Struggle" all over again. You have to destroy every shuttle in a hilly area chock-full of turrets and Battle Pods. The Battle Pods respawn, but you can't ignore them or they'll blow you to bits. Blow up the shuttles as they appear on your radar, but take out a few turrets whenever possible as well. The VF-1J or VF-1A are your best shot, but this will take skill.

MISSION 8 - LIGHTNING STRIKE

Each depot holds an Officer Pod and some Battle Pods. Destroy them and then the supplies. When you reach the supply crates, clear the area or you won't live to draw your sniper scope.

MISSION 9 - NONE SHALL PASS

For the first few MPA snipers, use the hills and bridge to hide and take a shot with your own sniper rifle. Once you get to the third bridge, there are two MPA snipers hidden behind small hills up ahead. Fly to the right off the bridge and go around the hill on the left to sneak up on the last two MPAs. Re-Entry Pods will drop off Battle Pods, but ignore them.

MISSION 10 - VENGEANCE

One-on-one against Gorian, the Zentraedi MPA leader. Treat him like any normal Battle Pod, but when he lands on one of the hills, drop below his line of sight! Duck!

MISSION 11 - CAT & MOUSE

To protect Izzy, stay a few hundred yards ahead in Guardian form and take out the Fighter and Battle Pods. Do not stray too far ahead, because a surprise attack happens from behind about halfway through the canyon. A dozen laser turrets at the end of the canyon mark the end of the level. Get in close and take them out rapidly.

MISSION 12 - STORMY FRIENDSHIP

Quick, switch to snipe mode! Take out the Scout Pod and deal with the two Battle Bods that come a runnin'. Progress slowly through the canyon and destroy the Pods and turrets. Once you find Hiro, hover over him and take out the enemies coming from the left, front, and right. There are roughly four waves for each side.

MISSION 13 - DEFIANCE

Two waves of Fighter Pods, a Cyclops Carrier and two waves of MPA Pods. Dodge like mad and take out that Cyclops ASAP.

MISSION 14 - ATTRITION

Do not stop. You have four minutes to retrieve four crates. Fly to each in Fighter mode, blasting enemies as you go by. Return to each in Guardian mode, but do not stop. Once the last is at the base, transform into Battloid mode and destroy the incoming Battle Pods. Your GunPod should do well at shooting down missiles.

Chapter 5

MISSION 1 - BESIEGED

Chase gives you an important hint before the mission: Monster Destroids can destroy anything on land. Concentrate on the Fighter Pods, destroy Battle Pods if you have time, and ignore Re-Entry Pods.

MISSION 2 - SHOWDOWN

A one-on-one duel with Kiyora. Use the VF-1J if you're good at dodging missiles with the Guardian, but the VF-1A is the best overall choice. Launch your missiles at her and shoot her down. If you need a break, fly into the clearing in the hills and hide behind the knoll. Don't sit there too long or she will attack the bunkers.

MISSION 3 - NO ESCAPE

There are three shuttles and three Officer Pods to destroy. Use Fighter mode to speed toward the shuttles. Take them out first! Next come the Officer Pods. Get in close and use Battloid or Guardian and strafe, or you can snipe at a distance. The laser turrets are actually the tough spots in this level, but they cannot hit you easily if you fly low.

MISSION 4 - WARPATH

Destroy the two Cyclops warships and then let Izzy deal with the horde of Fighter and MPA Pods. Destroy eight Re-Entry Pods in five minutes. The VT-1D may be a good choice. Here's a big hint: If you bob the nose of your plane up and down in Fighter mode, most enemy missiles will miss.

MISSION 5 - WELCOME TO ZEN CITY

Walk ahead and use the concrete barricades as cover while you shoot the turrets and two Pods. As you near an intersection and the radar goes kaput, pull back to avoid the laser fire.

Transform into Fighter mode and speed through to the other side of the intersection. Use the barricades as cover to take out the turret and the Scout that you can see. Then head left around the side of the building to sneak up on the other turret and MPA Pod. Another will spawn atop the ruins, so pull back and take

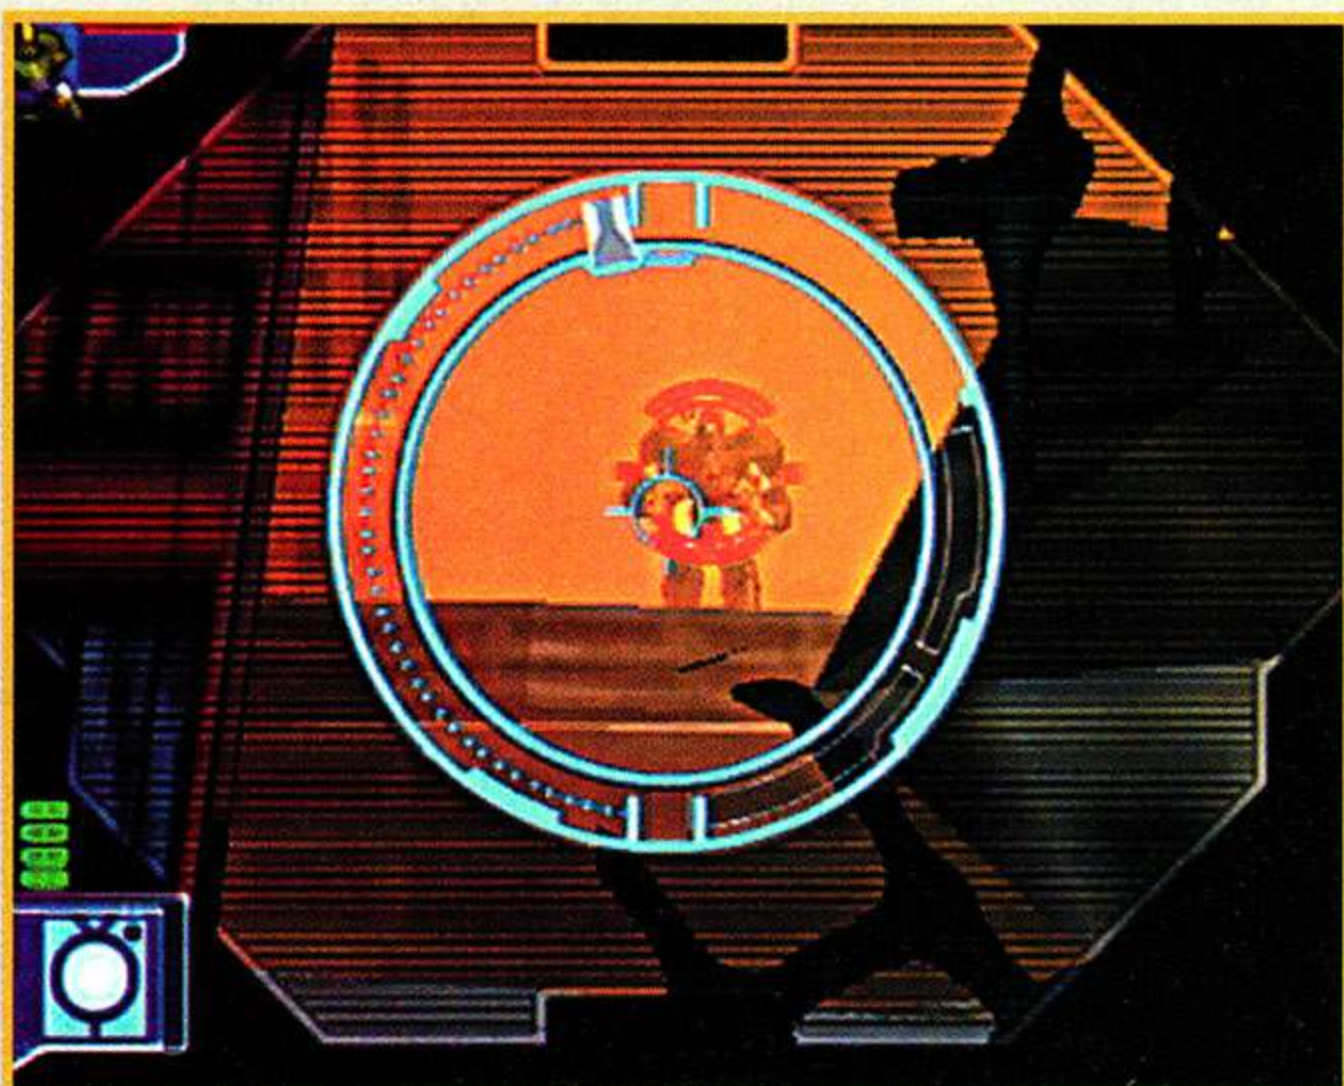

FLAT LINE LOW NEUTRAL HIGH INSANE

care of it.

Around the next intersection is a missile turret—watch out! Use your GunPod and step out from beside the building to fire, then sneak back when it launches its payload. Do the same on the distant turrets at the next intersection.

There are two MPA Pods that you can shoot from behind debris at the corners.

Up ahead, shoot the pipe to put out the fires and deposit all three pilots on the street behind you.

Up ahead are another laser turret and Scout Pod. Use the debris to hide and snipe them. Another Scout Pod will come around the bend up ahead.

At the next intersection, hide behind the stone outcropped and check out the MPA Pod and laser turret in the distance. Cheaters! Use some L and R-style strafe-shooting on 'em! There's another MPA Pod off to the right as you peer past the next corner.

There's a Scout Pod in the swamp.

Take the street on the left so you can use the debris for cover against the turret and Scout. Do the same at the next intersection for the second turret. When you reach the next building, peer around and take out the Scout so you can see the two MPA Pods hiding. Snipe them both.

Around the next corner are two turrets and a Missile Pod. Take 'em out and you're almost done!

MISSION 6 - TO THE DEATH

Take out the nearest set of turrets on the battleship and the missile launchers at the top, then fight Zeraal. To beat him, remain in Fighter mode and do your best to volley missiles. Multi-missile volleys will hit him pretty hard. If you select the Super Veritech upgrade and manage to hold onto it after the turrets, this mission is a lot easier. If not, you just have to aim high.

CONGRATULATIONS, Soldier!!!

You have beaten Robotech: Battlecry and earned your stripes as an RDF pilot. Now kick back and have a cold one (soda or fruit juice).

FIRE

BECOME A FIRE PRO 2 EXPERT IN FIVE EASY LESSONS

Fire Pro Wrestling 2 is awesome. It is, perhaps, the best wrestling game on any platform. But it's also very challenging.

You have to know how to time your moves. You have to know what moves will give you an advantage. You have to know how to weaken your opponent. And you have to know your wrestler's special techniques.

There's plenty more where that came from, but we're here to cut through the encyclopedia to give you the skills and knowledge you need to break this game wide open. In just five lessons, you too can strut like "Hollywood" Hulk Hogan. (Dude, retire already!)

By Frank Provo

LESSON 1: TIMING

Input the commands for take-downs and holds when you actually grab someone. This means at the exact moment your hands touch his shoulders or waist. Not before. Not after.

Strong and grapple-type wrestlers can graduate to medium (A) and strong (A+B) attacks sooner than fighters and acrobats.

Counter. If your opponent tries to perform a medium take-down or a Hammer Throw, tap B when he begins the grab or midway through the move in order to slip out.

Submissions work best past the 10-minute mark.

LESSON 2: WEAKEN THE OPPONENT

Your first five or so grapples should transition into headlocks with the L button, followed quickly by A or B. Tap

A when the opponent is down for a cheap hit.

Mix up the next minute or so of the match with weak grapples (B button)

and punches and kicks. When you think you've weakened them enough, graduate to the more skillful weak grapples (Left or Right + B). This is also the time to begin using Hammer Throws (R button).

Gradually increase your takedown strength and techniques. Graduate from weak grapples to medium. After a few simple A button grapples, graduate to the more advanced (Left or Right + A). You will perform devastating suplexes and piledrivers with Up or Down + A.

Finishers/Critical: The use of Finishers is to deplete your opponent's stamina to baseline. Find out your wrestler's Finisher move in the Edit mode and use it late in a match. Then pin or go for a speedy submission.

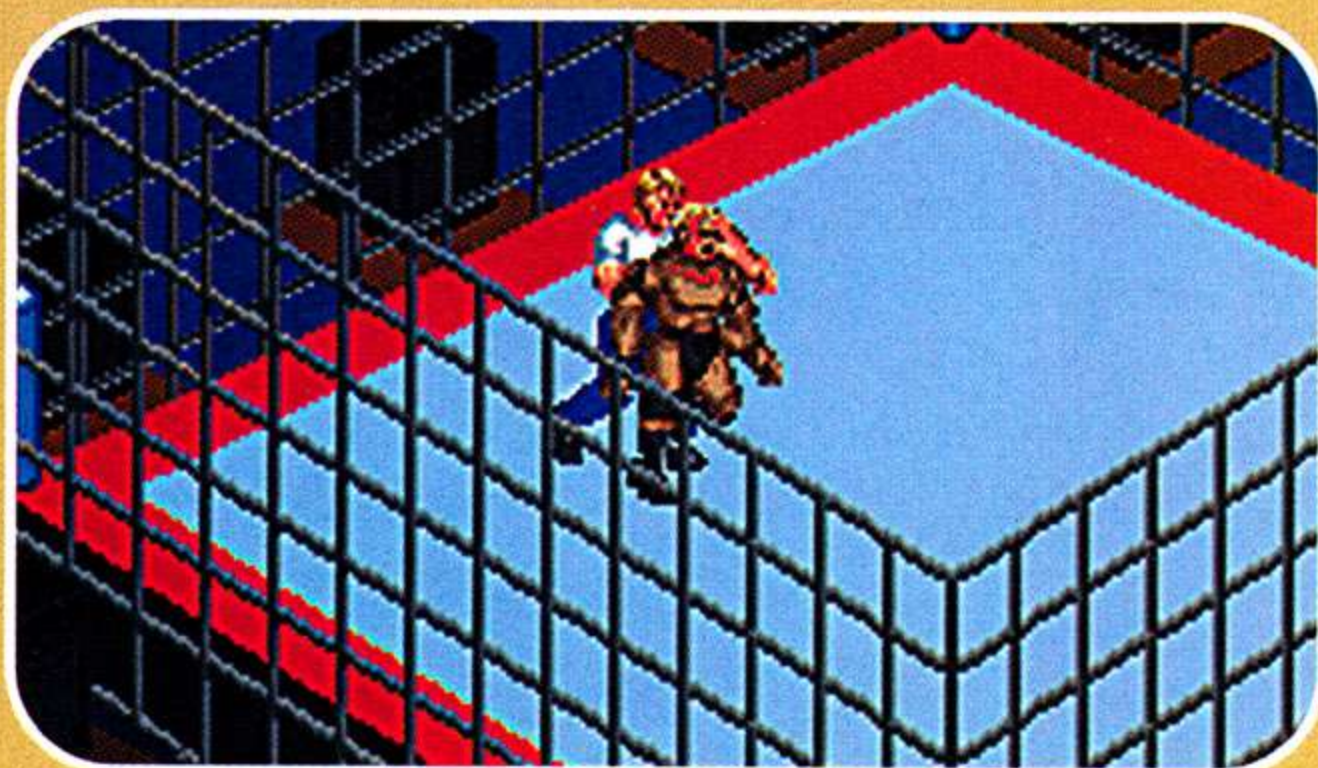

FLAT LINE LOW NEUTRAL HIGH INSANE

"FirePro is running wild! Now can you dig that, sucka!"

PPRO WRESTLING 2

LESSON 3: BE CLEVER (CHEAP)

If you've knocked down the opponent, don't always take the opportunity to follow up. Instead, hold the L button to breathe. You'll regain stamina this way.

Beat Gruesome matches the easy way. Use groin kicks, eye gouges, arm breaks or neck chops to brutalize the opponent in a hurry. In Gruesome mode, all "illegal" moves are doubly strong. This also includes submissions and any attack where the referee issues a warning count.

Once you can land medium takedowns, use a piledriver to throw your opponent out of the ring. This will dole major damage.

In Deathmatches, fling opponents into the electrified cage with a Hammer Throw (R button).

Notice that blood? If you repeatedly attack the same area, you'll injure your opponent. If he is bleeding from the head, pull him up from a knockdown and punch him in the back of his skull. Bye bye.

LESSON 4: GOOD SKILLS

Mix up your grapples—both CPU and human opponents are more likely to counter a move after the second or third attempt.

Use B to pick your opponent up when he is laying face down. Wrestlers recover some stamina while flat on the mat.

If your opponent is down near a turnbuckle, climb up and

jump on him. Only do this if the opponent is clearly winded.

Once you can successfully pull off a strong grapple (A+B), it's time to go for the win. Execute a behind-the-back takedown or a finisher, then pin for the three-count. A submission works well too, especially in tag matches.

Breathe! You'll be less tired from match to match if you breathe at frequent, short intervals. Also breathe when a match is over, because you get a few free seconds before the menu reappears.

In tag matches, choose wrestlers with different skills. A quick fighter and a brutish grappler make a great team.

LESSON 5: WRESTLERS

Not even an encyclopedia could fully teach the moves and strategies for all of the wrestlers in *Fire Pro Wrestling 2*. We've chosen to detail a select few that we think you'll enjoy using. If you need to view all of a wrestler's moves, load his model into the game's Edit mode.

Note: All of the special moves below are performed during grapples.

EPILOGUE: WRESTLER EDIT MODE

The real fun of *Fire Pro Wrestling 2* is its character editor. You choose the body. You choose the clothing. You choose the moves. You choose the strengths and the weaknesses. You

Who do I pick?

The initial set of 10 wrestlers is by no means the best in the game. But they're who you start with. With that in mind, your initial team should pair Jake with Gigaton Joe or Anonymys I.M. They're just that good.

After you clear Easy mode, pair up either Gigaton Joe or Anonymys I.M. with #128, Blade Hayate.

Once you've cleared the Normal mode, you should have a decent selection to tackle the last two modes.

If you're wondering what those stars mean below some of the wrestlers in the list, they indicate who you used to beat each mode. Easy = gold, Normal = bronze, Hard = silver, Special = green.

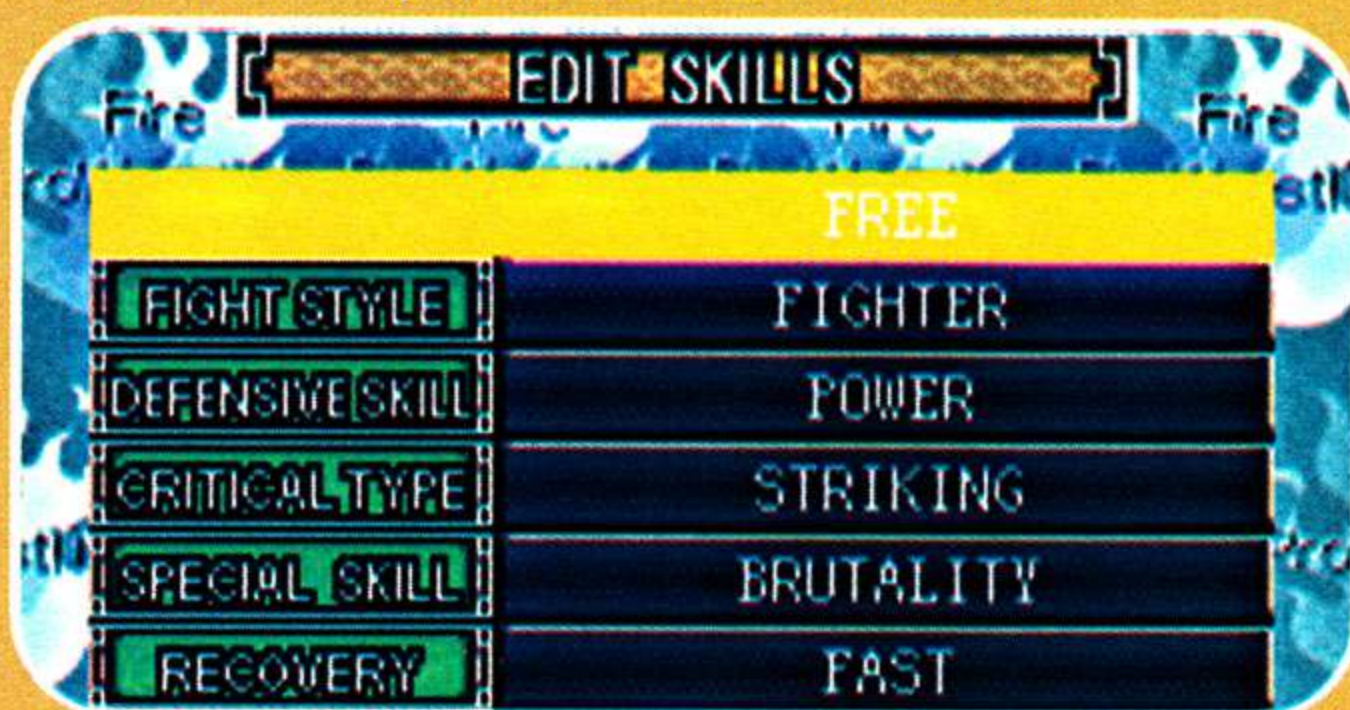

FLAT LINE LOW NEUTRAL HIGH INSANE

**"You know what, Mean Gene?!
This game rocks!"**

can even choose how the CPU behaves when using the characters you create. But to make really awesome fighters, you need to know a few tips.

EDIT SKILLS MENU

The Skills Menu is the most important of all. Here, you set the stage for the fighter you intend to create. Fight Style dictates your character's overall training and the moves he can master. For example, if you pick "Fighter," your wrestler will excel at punches, kicks and brutal combinations—but he won't be able to perform takedowns and suplexes as easily as grapplers or giants. "Shooter" is a very good style if you want to create an exciting fighter with decent acrobatics.

Critical Type and Special Skill affect the impact of your moves. The Critical Type influences what move will bring about your victim's demise. For example, if you select "Striking," a blow to the head may send him on a one-way trip to dreamland. Special Skill is a bit more general. Change it in order to excel at Brutality (opponent is bloody), Start Dash (can perform specials early), Blood (fighting while hurt) or numerous other situations.

There are a dozen other options to tweak in order to set up your wrestler's general fitness, but the trio mentioned above echo throughout the entire Edit mode.

EDIT ABILITIES MENU

There are 20 offensive and defensive traits that you can boost in the Abilities Menu. You only have 260 total points to build a character, and you probably used about 80 of them in the Skills Menu. Be smart here: Add to those traits that you'll actually use. Wrestlers don't need a high kick stat or a ton of technique. By the same token, how often will you actually be defending against a flying opponent or a lariat?

EDIT MOVES MENU

There are more than 1,200 moves to pick from, so we're not going to list them all. Try to pick moves that fit with the Fight Style you chose in the Edit Skills menu. These are designated with an A or B in the Affinity Level box. This doesn't mean that you can't assign a Triple German Suplex to a fighter, but he will tire from using it a lot faster than a grappler or a wrestler would.

The two boxes above the Affinity Level show the skill attributes that your wrestler has for each specific move. If

you've been paying attention, you'll notice that the numbers are identical to those you increased in the Edit Abilities Menu.

Generally, you want good affinity and high power ratings.

See the F and S symbols to the left of some moves? You can tap the L button to toggle these on or off next to specific moves. That way, you get to choose which moves are your specials (stronger) and which will be your Finisher.

Develop a system. Assign weak moves to B, medium moves to A, and stronger or more complex techniques to A+B. The majority of wrestlers will have high ratings for body punches, elbows, headbutts and kicks, so assign these to B. Let the A button give you easy access to strong one-step moves, like piledrivers, knee lifts, submissions and body slams. Assign the really complex techniques, like the Jewel Cutter and Northern Light Bomb, to A+B.

CPU LOGIC MENU

We could write an entire book about the CPU Logic menu. Basically, these numbers influence what your wrestler will do when controlled by the CPU. Don't take these settings too lightly, as you'll often relinquish control to the CPU during tag matches. You want your character to fight like he has a purpose.

The Small, Medium and Large Damage categories influence what your character will do against an opponent with the corresponding health level. For Small Damage, assign high percentages to weak moves. For Medium, keep the weak moves in play, but boost the percentages to your medium attacks and takedowns. For Large Damage, go for the win and boost your specials and A+B techniques.

You can assign behaviors for when an opponent is down, dazed, in the center of the ring, outside the ring, and even in a corner. Be smart, though. Even if the opponent has Large Damage, you should assign small percentages to the leaps and holds that are the most risky. Avoidance and hit-and-run tactics pay off better than psychotic leaps of faith.

Entertainment and Cooperation play against each other. If you assign a high play value to your character, he may be goofing around for the audience instead of helping you out during a late pin count. Likewise, a high level of cooperation means he'll be there when you need him, even if the audience is bored to tears.

**That's it! You're now a
Fire Pro Wrestling 2 expert!**

THE UNDERGROUND

THOUSANDS OF GAMING MAGAZINE EDITORS PROTEST THE XBOX

Maine, FL: Thousands of tired, fed up video-gaming magazine editors and writers congregated in Maine, Fla., last weekend to protest the continual existence of Microsoft's Xbox console.

"We've just had enough of pretending to care about the dang thing," said *Electrical Gamers Monthly's* John Riccurdi. "I mean, *Dead or Alive Volleyball*? Is that supposed to be some kind of joke?" *GameFun's* Flannel Fox concurred with the sentiment, adding that he was sick to death of saying polite things about *Halo* simply because he couldn't stand to see the hate mail resulting from not raving about the thing on a continual basis.

Worse still are the complaints from Xbox-dedicated magazine writers. Having spent the previous six months rewriting the same cheats for *Project Gotham Racing*, they claim they are simply not getting paid enough to face the mundane realities of boring games, an appalling upcoming release schedule and tacky lime green covering everything they see.

"Kill me now," pleaded one unnamed *Official Xbox Magazine* writer. "I haven't spent so much energy pretending to care about something since my girlfriend made me watch *Steel Magnolias*."

A crowd of geeks pushed to the limit.

SQUARE FANBOYS GO BALLISTIC AS FINAL FANTASY TACTICS IS ANNOUNCED

The Earth: Rabid, wild-eyed fans of the video-game company Squaresoft went on a crazy riot yesterday as news of *Final Fantasy Tactics* GBA become known. Thousands of naïve game players, who honestly believe that everything Square makes—even *The Bouncer*—is worth playing, rose up out of their parents' basements and headed for their local Electronics Boutique immediately.

"This is the best day of my life since my *Kingdom Hearts* FAQ was published on the Internet," said crazed fan Chuck Whitebread as he started camping out in anticipation of the game's late 2003 local release. "Square makes the best video games in the world and I was into them way before anyone else."

When asked if he was a fan of the original *Final Fantasy Tactics*, Chuck was confused. "I played all the Final Fantasy games. FF 7, FF 8, FF 9, FF 10...yep, that's all of them, right?"

Elsewhere around the country, crowds have grown restless waiting for the GBA strategy title to be released. "It must be taking so long because of all the graphics," opined Sammy Russell in front of large crowds gathering near Babbages. "The video sequences take three days to render a frame or something." When this *VGU* reporter told him that there wouldn't be any video in the GBA game and hardly any action, they pretended to still be interested in the game anyway, simply because Square fanboys are crazy in the head.

STRANGE GREY BLOBBY THING FROM VENTURE ON THE ATARI 2600.

Some gaming magazines may claim to get the latest details from the industry's biggest stars, but as per usual, *VGU* beats them all. This month we're talking to the strange grey blobby thing from *Venture* on the Atari 2600.

VGU: Thanks for talking to us

SGBTFVOTA:

Hey, no problem. Things have been quiet around here. You seen any dots nearby?

VGU: Uh...no. For those who didn't play *Venture*, can you tell us your role in the game and what you liked to do back then?

SGBTFVOTA: Sure. My job was basically to make sure the little dot thing didn't stay in the one room for more than 30 seconds. If they hung around for too long, I could come in and chase them off or kill them. One of the neat things about the job was that I could move through walls and other enemies and was completely invincible. Man, those little dots could really move fast when I was on their tails. I enjoyed the work because it gave me plenty of time to pursue my interest in acting. I was on that episode of *Diff'rent Strokes* where Willis and Arnold take each other on in an arcade-game competition. 1983 was a good year.

VGU: So what happened to you after that?

SGBTFVOTA: I went through some of the darkest years of my life. The power, fear and invincibility went to my head and I became obsessed with the rush it gave me. After a while, I wouldn't even wait 30 seconds and just start chasing players around, toying with them like a cat does with your eyes while you're asleep. The Atari 2600 became less popular with the kids and *Venture* became even more obscure than it was when it was released. I spent a lot of time alone, wandering around the dungeons like Burt Reynolds at a Burt Reynolds fan convention.

I keep telling those Quake guys that I'd do really well in their next game. I'd get rid of those ****ing campers real quick. They'd be crouching in a corner next to an ammo crate and them BAM! I'd be floating through the air toward them and they'd mess themselves in fear like *that*. I'd be all "HEY! You no good punk! You want some of *this*? HUH? DO YA?!"

VGU: Uh, OK. Thanks for your time.

SGBTFVOTA: YOU HAVEN'T HEARD THE LAST OF ME!

CONSOLES GET ONLINE

Things have certainly changed since *SOCOM: Navy SEALs* on PlayStation 2 was released. What makes this game special is that it's the first PS2 title to support online play via the Network Adaptor and voice-communication headset. In it, players get involved in team-based army combat and fight terrorists or other players around the world. It promises real-time online play just like the type enjoyed by PC gamers over the last five or so years.

VGU got on board and gave the game a try. The game plays well and the voice headset is a cool feature as it lets you give orders while your hands are busy as you fight other soldiers. The computer AI is a bit dumb at first, but then again so are we in the mornings, so it works out OK.

Just like the game advertised, online play was just like playing online games on the PC. It took ages to find a working server to play on, everyone we met online was an idiot who wouldn't play by the rules, and they spent all their time insulting each other instead of helping each other out.

Xbox Live, the online network for Xbox owners, promised everything the PS2 Network Adaptor does in addition to a matching system such as the one found in PC games like *Diablo* or *Warcraft 3*. We tried it and, yep, it works in the same way as the PC matching systems. Every time we joined a game, we'd be paired up with some random moron who had been playing the game for months and walked all over us while laughing.

The technology is cool, but the appeal of playing against random strangers who are more annoying than challenging still eludes us. Perhaps a solution to this problem is to play against some of our astute readers. If you're looking to play us online e-mail VGU1@hotmail.com, and we'll hook up!

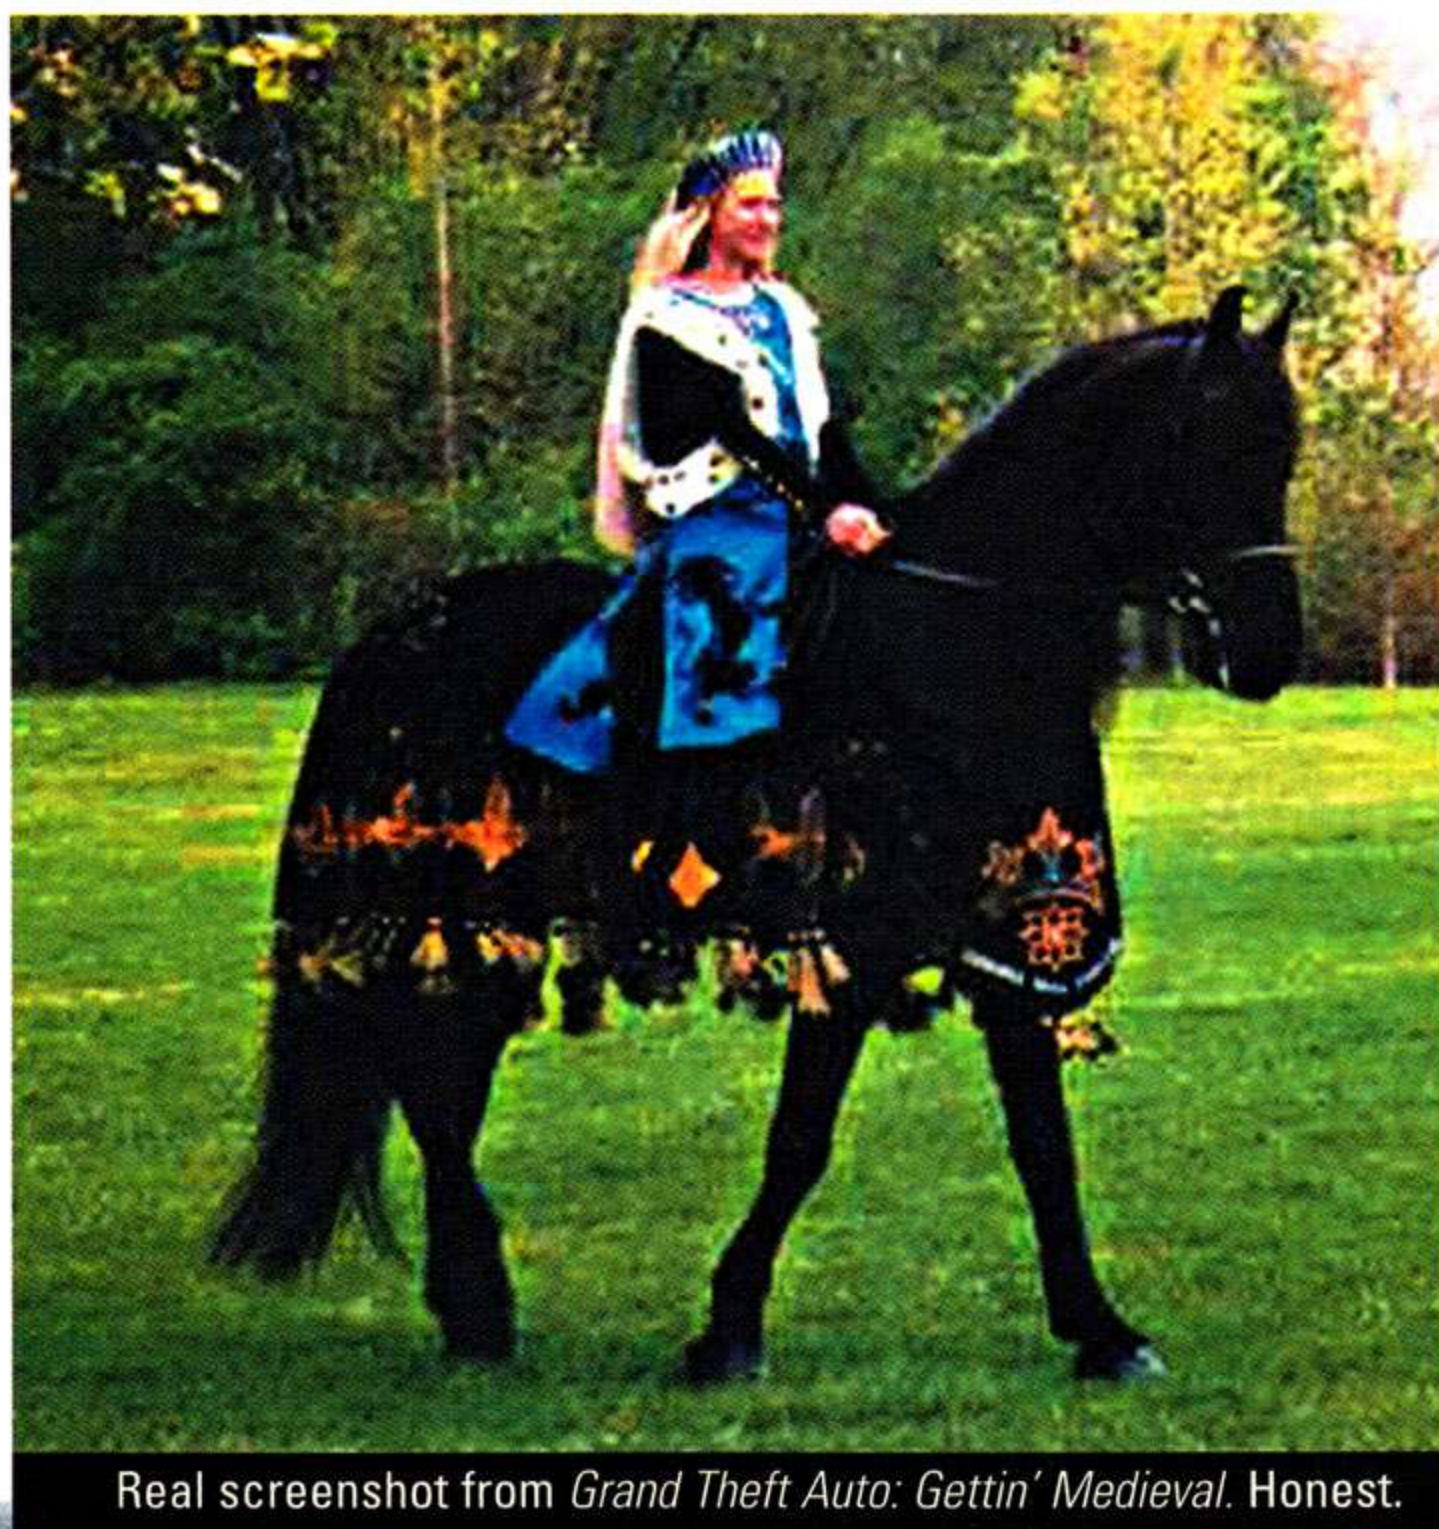

NEW GRAND THEFT AUTO SEQUEL ANNOUNCED

With *Grand Theft Auto 3* still selling like hotcakes at a hotcake appreciation society benefit meeting, it's no surprise to see the sequel doing the same. Titled *GTA: Vice City*, the game is set in the day-glo sock era of the 1980s, complete with a soundtrack by bands of the time who are best forgotten.

VGU can exclusively reveal that there's *another* sequel to *GTA* on the way, this time set in 1400s. Entitled *GTA: Gettin' Medieval*, the game will let players "carjack" horses as they perform "daring-do" missions for local members of Royalty. Missions will include robbing from the rich, giving to the poor, and perfecting your shooting skills on the archery range.

The entire kingdom of England will be realistically modeled for the game so players can explore wherever they like. Like *Vice City*, appropriate fashion will be on display as the ladies sport corsets and dresses the size of a small Buick. Instead of listening to the radio, a small monk will follow you around and play on his harp as you ride between castles.

Not much else is known at this time though it is rumored that the PlayStation 2 game will work with the Network Adaptor, allowing online play. Players can compete against each other in "Tournaments," including such events as jousting and fighting with swords. The game is expected to be released by the end of 2003.

Real screenshot from *Grand Theft Auto: Gettin' Medieval*. Honest.

Halo 2: It's Coming And There's Nothing You Can Do About It

Microsoft and Bungie Studios has announced that *Halo 2* is officially on the way to the Xbox soon. While this news is hardly a surprise considering the original game sold well over a gazillion copies, people are warned that there really isn't much they can do about it.

This isn't really a *Halo 2* screenshot, but even if it was, you'd probably buy it]

"It's definitely coming out whether you like it or not," said Bungie in an official press release. "And, even if you try to resist, you're going to buy a copy sooner or later. Don't even pretend you can not buy it and an Xbox if you haven't already been brainwashed into it".

Halo 2 will feature more levels, a better single-player campaign and compatibility with Xbox Live, though none of these features were really necessary to make you want to buy the game. Oh, and *Project Gotham Racing 2* while you're at it.

High and low settings allow for fan-rate adjustment, depending on just how tightly the game pad is stuck to your paws. Works surprisingly well, providing a level of comfort standard plastic parts simply can't. Now if only they'd design one that also fed you grapes....

The need for speed is upon you. The need to save cash is manifesting itself, too. Go with an affordable, miniscule (9-inch) wheel with separate analog gas/brake pedal unit. Fully programmable controls, an eight-way digital D-pad and analog C-stick also render it an ergonomic marvel. Configurable to any situation and an ease to rotate, you'll soon see why it's the only wheel Dale Earnhardt, Jr. endorses, and not just because of the massive royalty checks.
